1 General Information

1.1 Introduction

The City of Vestavia Hills (City) was issued by the Alabama Department of Environmental Management (ADEM) a Municipal Separate Storm Sewer System (MS4) Individual Phase I Permit (ALS000017) on July 11, 2022. This date is also the effective date of the permit.

As a condition of this permit, "The permittee is required to develop, revise, implement, maintain and enforce a storm water management program (SWMP) which shall include controls necessary to reduce the discharge of pollutants from its MS4 consistent with Section 402(p)(3)(B) of the Clean Water Act and 40 CFR Part 122.26".

Per the requirements of NPDES Permit Number ALS000017, BMPs, measurable goals, and responsibility designations are provided for each of the following program elements:

- Storm Water Collection System Operations
- Public Education and Public Involvement on Storm Water Impacts
- Illicit Discharge Detection and Elimination
- Construction Site Storm Water Runoff Control
- Post-Construction Storm Water Management in New Development and Re- Development
- Spill Prevention and Response
- Pollution Prevention/Good Housekeeping for Municipal Operations
- Application of Pesticides, Herbicides, and Fertilizers
- Oils, Toxics, and Household Hazardous Waste Control
- Industrial Storm Water Runoff

The passage of **Legislative Act 95-775** in 1997 enabled the mayors of municipalities within Jefferson County to establish Storm Water Management Authority, Inc. (SWMA). SWMA functions on behalf of its members to meet the compliance requirements of each NPDES permit. SWMA has subcontracted with the Jefferson County Department of Health (JCDH) to perform certain responsibilities. SWMA members, the Board of Directors, and mayors are aware that the ultimate responsibility toward permit compliance lies with the municipality. SWMA's contract with JCDH and SWMA Bylaws are found in **Appendix A**.

The 2023-2024 annual report covers the reporting period from October 1, 2023, through September 30, 2024. The current permit cycle will expire in 2027.

Submission of this report to ADEM is pursuant to Part IV of the permit.

1.2 Contact Lists

1.2.1 Municipality Contacts

Name	Title Work #		E-mail Address	Address			
Ashley C. Curry	Mayor 205-978-3675		acurry@vhal.org	1032 Montgomery Hwy., Vestavia Hills, AL 35216			
Jeff Downes	City Manager	205-978-0195	jdownes@vhal.org	1032 Montgomery Hwy., Vestavia Hills, AL 35216			

1.2.2 JCDH Contacts

Name	Title	Work #	E-mail Address	Address
Jeff Swinney	Program Manager			1400 Sixth Ave S Birmingham, AL 35233
Scott Hofer	Public Health Engineer	205-930-1274	scott.hofer@jcdh.org	1400 Sixth Ave S Birmingham, AL 35233
Jonika Smith	Environmental Health Specialist	205-558-2103	jonika.smith@jcdh.org	1400 Sixth Ave S Birmingham, AL 35233

2 Program Evaluation

2.1 Objective of Program

The Purpose of Vestavia Hills' program is to comply with the requirements of the NPDES permits to reduce the discharge of pollutants from the municipal separate storm sewer system (MS4) to the maximum extent practical.

2.2 Major Findings

The health of the streams that receive runoff from the MS4 appears to be stable with no signs of improvement or degradation. See Section 3.11 for an explanation of this conclusion.

2.3 Major Accomplishments

- Ability of the City's efforts to promote Low Impact Development has been further strengthened by permit procedures that include quantification and limits of impervious areas in new single family home construction and redevelopment.
- Utilization of "Open Gov" permitting system for better record keeping, including addition to better track privately owned Post Construction BMPs.
- Development of working relationships and partnerships with environmental groups and stakeholders for cleanup events in City parks.
- Established procedures to hold internal "mid-year checkpoint" meetings with relevant city staff to review ongoing efforts of our stormwater program.

2.4 Overall Strengths and Weaknesses

2.4.1 Strengths

Industrial Storm Water Runoff – A mobile application is used to document inspections of industrial and high-risk runoff sites. The inspections increase awareness of storm water as well as confirm proper BMPs are in place to prevent and effectively respond to an illicit discharge.

Water Quality Monitoring – The United States Geological Survey (USGS) continuous monitoring station on the Cahaba River near Mountain Brook, 02423380, provides real time data on temperature, pH, turbidity, specific conductance, dissolved oxygen, and water level in real time. The data is subject to a review and approval process by USGS. In addition, this information is available for public viewing.

Complaints and Investigations - The accessibility of the City's online VH Connect system for residents to file complaints in conjunction with the complaint system used by JCDH allows inspectors to efficiently investigate and resolve violations. The system also provides useful documentation of the number and types of complaints received.

Reporting - The City's "Open Gov" tracking software allows more efficient tracking of permitted activities. The online program managed by JCDH called Storm Water Online Activity Report (SOAR) allows standardized reporting of storm water related activities. City personnel submit activity information remotely that is stored in a centralized database. Standardization of the data allows for better reporting and statistical information. The mobile application called Construction Site Inspections (CSI) allows inspectors to electronically complete site inspections and automatically submit into SOAR.

GIS Mapping of Storm Drains – JCDH has been mapping the City's storm drain system. Mapping provides a structural inventory allowing for better maintenance and fiscal planning. This data could also be used for future hydrologic modeling.

Dry Weather Screening – The illicit discharge program utilizes efficient and precise technology to map and record findings about each outfall. JCDH uses a smart phone to complete an electronic questionnaire and record a photo along with the physical description, and pertinent water quality data. The data is stored in the electronic cloud allowing for quick access on any device.

Education –SWMA has collaborated with Bessemer, Birmingham, and Unincorporated Jefferson County storm water programs to develop and implement a video contest called "Litter Quitters". A storm water commercial that aired on local television stations resulted from this program. Anti-littering campaign messaging was posted on billboards and on public transit throughout the County. This partnership has allowed SMWA to engage more effectively with high school students and provide a message to county residents in a new and exciting way. Two clean-ups sponsored by Cahaba Riverkeeper were held in the City.

2.4.2 Weakness

Standard Operating Procedure (SOP) Manual- The current SOP manual was completed in 2011. Updates are needed to include new SWMPP protocols and revisions to existing protocols.

2.5 Future Direction of the Program

Vestavia Hills will continue to provide activities to meet MS4 permit requirements. In person educational activities are planned and will be conducted as schedules allow.

2.6 SWMPP Overall Effectiveness

The SWMPP serves as a guide for the City to identify both the actions required and the responsible personnel needed to accomplish compliance with the permit. The SWMPP was effective overall.

2.7 Actions Not Accomplished

- While progress has been documented, records of total applications of PHFs by contractors working for the City have not been effectively compiled for the reporting period. This item remains in progress.
- Some privately-owned post construction BMP inspections reports have not been completed in a timely manner for this reporting period. New "Open Gov" permit renewal process has been initiated, but the City continues to work to improve notifications and response time to and from these private owners.

3 Narrative Report

3.1 Storm Water Collections System Operations

3.1.1 Objective

The objective of the Storm Water Collections System Operation Program is to inspect and maintain structural controls in order to minimize the contamination of the local waterways by storm water runoff.

3.1.2 Activities Complete or in Progress

Activity 1: Permittees shall maintain a map of the structural controls. This activity is complete.

Activity 2: Inspect existing and newly constructed structural controls on a semi-annual basis as well as maintain the structural control and remove any litter or sedimentation so that the structural control functions as designed. This activity is complete.

Activity 3: Develop a checklist for inspection and maintenance of structural controls. This activity is complete.

Activity 4: Maintain an inventory of structural controls as well as the inspection and maintenance records for each structural control. This activity is complete.

3.1.3 Annual Reporting

The City has an inspection program in place for its structural controls. There are seven city-owned structural controls. A map of the structural controls can be found in **Appendix B**. During this reporting period, all required inspections were completed. One facility, the new Vestavia Hills Civic Center complex, was accepted for maintenance by the City during this reporting period and thus, only has one City inspection and maintenance report. Maintenance activities included weed-eating, cutting of small brush, removal of debris and vacuum cleaning. Inspection and maintenance documentation can be found in **Appendix B**.

The status of this element is complete. Maintenance activities will continue to be documented.

Assessment of this element indicates the program is successful overall. A checklist is in place that identifies the items that are to be addressed. The SOAR program is available for documentation of activities. Additionally, the maintenance performed allows the structural control to perform as it was designed. No revisions are proposed at this time.

3.2 Public Education and Public Involvement on Storm Water Impacts

3.2.1 Objective

The Public Education and Public Involvement Program was designed to inform the community about the impacts from storm water discharges on water bodies and how different segments of the community can reduce possible storm water pollutants.

3.2.2 Description of Educational Programs

SWMPP Involvement

Public involvement and input in the development of the SWMPP were achieved by announcing the request for input at council meetings and posting the document for public comment. Draft copies of the SWMPP were posted on the City's website for the public to review.

Informational Handouts

The Program employs a campaign to educate citizens on the importance of proper storm water pollution prevention through the use of brochures, calendars, and pamphlets. The use of these materials is an effective way to reach the public. Approximately 140 handouts were provided during this reporting period.

The City distributed brochures covering the following issues: storm water fees, household hazardous waste, pet waste disposal, fertilizers, pesticides, composting, watershed protection, low impact development, and erosion and sedimentation control. These can be found in **Appendix C**.

The City distributed a total of 70 storm water calendars for 2024. The JCDH calendars depict photos of local creeks and wildlife. Additionally, information is included on various storm water topics along with links to informational sites, recycling services and community events. A copy of the calendar can be found in **Appendix C.**

Outreach Materials

Education and outreach materials have been developed by JCDH in an effort to reach primary and secondary school students. Topics presented include: watershed protection, safety tips to reduce and/or eliminate litter, excess storm water runoff and household chemicals' entry into storm drains within SWMA member cities. The formats that have been distributed include stickers, bookmarks, pens, magnets, branded carabiners, coloring books/activity sheets, t-shirts, and backpacks. Samples of some of these items can be found in **Appendix C**.

Signage and Other Messaging

In previous years, JCDH distributed road signs denoting the local watershed with an anti-litter message. The signs were designed to bring attention to the local waterways as well as convey an educational message to citizens. During the prior reporting period, "No littering or dumping"

signs received from ADEM were posted throughout the City. See **Appendix C** for pictures of the different signage.

For this reporting period, the Litter Quitters program aired storm water commercials on local television stations. The program also posted anti-littering messaging on billboards and public transit throughout the County.

Website

The City's website includes a storm water webpage with information on many aspects of storm water. The webpage informs citizens of the City's program with information links, educational downloads, hotline numbers, and other pertinent storm water documents as required by the permit. New information is added as necessary.

Reporting Hotline

The City has phone numbers on the webpage for citizens to register complaints, express their concerns and to get information on watershed management in their local area. The City utilizes an online Action Center for residents and property owners to report issues to the City. Storm water runoff concerns are directed immediately to City personnel. Additionally, contact information is provided by periodic social media posts, City newsletters, and scrolling video message board at City Hall.

Municipal Meetings

JCDH and SWMA are involved in multiple cooperative meetings regarding environmental hazards within Jefferson County, and collaborative efforts to improve storm water awareness. Included in these efforts was the Litter Quitters program.

Public Presentations

JCDH personnel spoke at a Friends of Shades Creek meeting during this reporting period. The objective was to raise awareness of the impacts of storm water.

Public Outreach Events

Throughout the reporting period, numerous events provided JCDH and SWMA opportunities to present educational information to a variety of people of diverse economic and cultural backgrounds. Informational brochures and outreach materials were distributed at these events. Some of the events attended include Shades Creek Salamander Festival, Fiesta Birmingham, Children's Health Month, Rain Barrel Workshop, Cahaba River Society Fry Down Expo, Miles College Spring Health Fair, and Birmingham Area Municipal Administrators Association Exposition. Household Hazardous Waste Collection Day and other similar outreach events are discussed more in section 3.9

<u>Jefferson County Erosion and Sedimentation Control Workshop</u>

The last erosion and sedimentation control workshop was held on June 18, 2024. The class is marketed to builders within Jefferson County to inform them of the best management practices and the requirements of the municipalities. The class is held every two years. The construction best management practices covered in this workshop are also posted on the City's website.

Cleanup Events

The City participated in two cleanup events hosted by Cahaba Riverkeeper on April 27, 2024 and July 27, 2024 at Meadowlawn Park and McCallum Park respectively. These events resulted in the removal of approximately 1 ton of litter and debris. See **Appendix C** for documentation.

3.2.3 Annual Reporting

The Public Education and Public Involvement on Storm Water Impacts program is a combined effort by JCDH and the City. JCDH offers educational materials, presentations, training materials, and cleanup supplies. A detailed list of the public education events and participants can be found in **Appendix C**.

The status of this element is complete. The education program provides a variety of materials promoting storm water messaging.

Assessment of the education program appears to be positive. The programs offered are engaging and varied. Communication mechanisms distributed include stickers, bookmarks, pens, magnets, branded carabiners, coloring books/activity sheets, t-shirts, and backpacks. The information has produced a positive impact as shown by the cleanup activity organized by local volunteers that resulted in the removal of trash and debris.

Litter Quitters commercials and messaging broadcast throughout the County, as well as outreach materials provided at City Hall, met the requirement for public education. The City's litter clean-ups as well as City-wide and County-wide Household Hazardous Waste Collection Day events encouraged public involvement. There are no other proposed revisions at this time.

3.3 Illicit Discharge Detection and Elimination (IDDE)

3.3.1 Objective

The objective of the Illicit Discharge Detection and Elimination Program is to eliminate illicit discharges into the MS4 to the maximum extent practicable.

3.3.2 Activities Complete or in Progress

Activity 1: Develop and annually update an MS4 map that includes the latitude/longitude of all known major outfalls as well as the names of the waters of the state contiguous to the MS4. This activity is complete.

Activity 2: Enact an ordinance that prohibits non-storm water discharges to the MS4. This activity is complete.

Activity 3: Have a dry weather screening program designed to detect and address non-storm water discharges into the MS4. A minimum of 15% of the major outfalls must be screened each year. This activity is complete.

Activity 4: Procedures for tracing the source of a suspect illicit discharge. This activity is complete.

Activity 5: Procedures for eliminating an illicit discharge. This activity is complete.

Activity 6: Procedures to notify ADEM of suspect illicit discharge discovered within the Permittee's MS4 from an adjacent MS4. This activity is complete.

Activity 7: A mechanism for the public to report illicit discharges and procedures for appropriate investigation. This activity is complete.

Activity 8: A training program for appropriate personnel on identification, reporting and corrective action of illicit discharges. This activity is complete.

Activity 9: Post ordinances or other regulatory mechanisms on their website. This activity is complete.

3.3.3 Annual Reporting

The current permits require the Permittees to map the outfalls that lead to the waters of the state. JCDH uses the National Hydrography Dataset (NHD) to identify waters of the state. With many unmapped waterways and unknown outfalls, JCDH attempts to inspect over 15% of the total waters of the state within each Permittee's municipal boundary annually. The goal is to inspect 100% of the waters of the state within the five-year permit cycle. JCDH has also documented the procedures for mapping, tracing sources and eliminating illicit discharges in the 2011 SOP Manual.

JCDH offered training videos to SWMA members for educating municipal workers on different aspects of storm water including illicit discharges. The videos are hosted on an FTP server to allow members accessibility.

The status of this element is complete. The goal of inspecting the planned percentage of outfalls for the reporting period was accomplished. An IDDE ordinance was adopted on June 11, 2018. This ordinance can be found at https://library.municode.com/al/vestavia_hills/codes/code_of_ordinances.

Assessment of this element shows approximately 9.14 miles or 20% of the City's waterways were walked, meeting the goal of inspecting over 15% annually. Maps of the completed and proposed stream sections for the upcoming years can be found in **Appendix D**. Additionally, staff members inspected 24 illicit discharge complaints (see **Appendix D**). All investigations are documented in JCDH's SOAR Program which includes sampling results, corrective actions taken and dates. These complaint reports are available from JCDH upon request. Attendance sheets for completed IDDE training can also be found in **Appendix D** There are no proposed revisions at this time.

3.4 Construction Site Storm Water Runoff Control

3.4.1 Objective

The objective of the Construction Site Storm Water Runoff Program is to reduce, to the maximum extent practicable, storm water runoff into the MS4 from qualifying construction sites.

3.4.2 Activities Complete or in Progress

Activity 1: Procedures to require all applicable construction sites to obtain the applicable NPDES permits. This activity is complete.

Activity 2: Having an ordinance that requires effective erosion and sedimentation control. This activity is complete.

Activity 3: Requiring construction site operators to control waste at a construction site that may cause adverse impacts to water quality. This activity is complete.

Activity 4: Enacting procedures for site plan review to ensure effective erosion and sedimentation controls. This activity is complete.

Activity 5: A mechanism for the public to report construction site pollution. This activity is complete.

Activity 6: Inspect sites in accordance with frequency specified in the permit. This activity is complete.

Activity 7: Training for the construction site inspection staff in the identification of appropriate construction best management practices. This activity is complete.

Activity 8: Development of a construction site inspection checklist. This activity is complete.

Activity 9: Implementation of an enforcement response plan. This activity is complete.

Activity 10: Availability of educational and training materials and resources for construction site operators. This activity is complete.

Activity 11: Posting ordinances or other regulatory mechanisms on their website. This activity is complete.

3.4.3 Annual Reporting

The City passed an ordinance that addresses effective erosion and sedimentation control (https://library.municode.com/al/vestavia_hills/codes/code_of_ordinances). Through this ordinance, procedures have been implemented to require all applicable construction sites to obtain necessary NPDES permits. Construction site operators must control waste that may cause water quality issues. Practices have been established for site plan review to ensure effective erosion and sedimentation controls. The frequency of construction site inspections is determined by the permit. The enforcement response is escalating and includes verbal warnings and stop work orders.

A construction site checklist is used to address potential problems and allow an enforcement response. The public may report construction site pollution complaints by calling city hall. Inspection staff are provided an opportunity to receive appropriate best management practices through Qualified Credential Inspector (QCI) certification or equivalent courses. Finally, educational and training materials are made available to construction site operators by either printed materials or the city's website.

The status of this element is complete. The erosion control and sedimentation ordinance detailing construction site protocols was passed on June 11, 2018. Storm water educational materials and other pertinent information have been posted on the city's webpage.

Assessment of this element indicates the program has been effective in reducing storm water runoff. The permit application process has allowed for closer monitoring of construction site activities. City personnel issued 217 construction site permits, 13 of which were qualifying sites, and performed 3091 site inspections. This information can be found in **Appendix E**. Enforcement actions were sometimes needed to gain compliance. These actions ranged from verbal warnings to stop work orders. A total of 7 notices of violation, 9 stop work orders, and 6 compliance orders were issued during this reporting period. The City has five certified inspectors, two QCI and three Qualified Credentialed Professionals. Educational materials were provided to construction site operators via brochures and the webpage.

Changes instituted include providing information to construction site operators regarding the benefits of Low Impact Development (LID) and Green Infrastructure (GI) as part of the permit application process. Applicants are asked to acknowledge a statement of receipt of this information. No other changes are anticipated at this time.

3.5 **Post-Construction Storm Water Management in New Development** and Re-Development

3.5.1 Objective

The objective of the Construction Site Storm Water Runoff Program is to reduce, to the maximum extent practicable, the pollutants in any storm water runoff to the MS4 from qualifying construction sites.

3.5.2 Activities Complete or in Progress

Activity 1: Require landowners and developers to implement systems to reduce the discharge of pollutants. This activity is complete.

Activity 2: Require landowners and developers to mimic pre-construction hydrology runoff in post-construction using permit guidelines. This activity is complete.

Activity 3: Encourage landowners and developers to incorporate LID/GI. This activity is complete.

Activity 4: Adopt or amend an ordinance to ensure applicability and enforceability of post-construction BMPS. This activity is complete.

Activity 5: Require the submittal of a post-construction BMP plan. This activity is complete.

Activity 6: Require an "as built" certification within 120 days of completion. This activity is complete.

Activity 7: Perform and/or require the performance of, at a minimum, an annual post-construction inspection and maintenance of BMPs on new construction sites. This activity is complete.

Activity 8: Require the developer/owner/operator to keep records of the inspection and maintenance activities. This activity is complete.

Activity 9: Require and/or perform adequate long-term operation and maintenance of post-construction BMPs through legal means. This activity is complete.

3.5.3 Annual Reporting

The City passed an ordinance (https://library.municode.com/al/vestavia_hills/codes/code _of_ordinances) addressing post-construction requirements found in the NPDES permit. Landowners and developers are encouraged to incorporate LID and GI. Encouragement of LID/GI has been part of the permitting process.

The status of this element is complete. The ordinance containing post-construction requirements was adopted on June 11, 2018.

The City has fifteen qualifying developments that have been completed and in operation at this time. The inventory is reviewed annually and updated as necessary (**Appendix F**). Protocols are in place for BMP inspections and reporting. Means of notification to private owners for timely submission of inspection reports are being improved. No additional revisions are proposed at this time.

3.6 Spill Prevention and Response

3.6.1 Objective

The objective of the Spill Prevention and Response Program is to prevent, contain, and respond to spills that may discharge into the MS4.

3.6.2 Activities Complete or in Progress

Activity 1: Investigate, respond and conduct response actions or coordinate with other agencies that may provide response actions. This activity is complete.

Activity 2: Develop a mechanism to track spills, responses, and clean-up activities for all spills. This activity is complete.

Activity 3: Use an acceptable mapping scheme to identify spill locations, inspection locations and chronic problem areas. This activity is complete.

Activity 4: Implement a spill prevention/spill response plan. This activity is complete.

Activity 5: Provide training to appropriate personnel in spill and response procedures. This activity is complete.

Activity 6: Establish procedures to ensure that all spills are promptly reported. This activity is complete.

3.6.3 Annual Reporting

Vestavia Hills Fire Department has a mechanism to investigate, respond, and conduct response actions. Jefferson County also has an Emergency Management Agency (EMA) that coordinates and assists cites with spills and clean-up. The Fire Department and EMA document spills, responses, and clean-up activities. JCDH has the capability to exhibit spill locations, locations for inspections, and chronic problem areas in GIS. JCDH provides training videos for non-first responder personnel on spill prevention and response. Also, the City has procedures in place to ensure spills are promptly reported to the appropriate authority.

The status of this element is complete.

Assessment of this element indicates the program has been effective in spill response. two spills were reported; see table below for details. Vestavia Hills Fire Department has 106 staff members. Of these members, 40 are Hazardous Materials Awareness & Operations certified and 66 are certified Hazardous Materials Technicians. Certification details are on file with the Fire Department. There are no proposed revisions at this time.

Spill Response Summary					
Spill Location	Spill Substance	Incident Dates and Times to Resolution	Enforcement Actions		
I-65 MM 252.4	18-wheeler saddle tank rupture 50-100 gallons	1/9/2024	None Reported		
3266 Cahaba Heights Rd.	Battery fire water runoff Unknown volume	9/9/24	None Reported		

3.7 Pollution Prevention/Good Housekeeping for Municipal Operations

3.7.1 Objective

The objective of the Pollution Prevention/Good Housekeeping Program is to prevent and reduce the discharge of pollutants in storm water run-off from municipal operations to the MEP.

3.7.2 Activities Complete or in Progress

Activity 1: An inventory of all municipal facilities. This activity is complete.

Activity 2: Develop and implement a short and long term strategy and program for removal of trash from waterways and tributaries. This activity is complete.

Activity 3: Require appropriate Best Management Practices for events. This activity is complete.

Activity 4: Provide trash receptacles for high trash generated areas. This activity is complete.

Activity 5: Develop a Standard Operating Procedure detailing good housekeeping practices. This activity is complete.

Activity 6: Develop a program to inspect municipal facilities with checklists and procedures for correcting noted deficiencies. This activity is complete.

Activity 7: Develop a training program for municipal staff on good housekeeping. This activity is complete.

Activity 8: Assess the water quality impacts of flood management programs. This activity is not applicable.

3.7.3 Annual Reporting

An inventory of all municipal facilities has been compiled. The inventory is reviewed annually and updated as necessary (see **Appendix G**). Protocols are in place for the short and long term removal of trash from waterways and tributaries. A SOP for events is included in the SWMPP for SWMA cities. In 2011 the City adopted a SOP manual that contains procedures regarding this program element. The checklist and procedures used for inspections are also found in the SOP manual. Training is provided for municipal employees that covers this program element.

The status of this element is complete. The City does not currently own or operate flood management projects.

Assessment of this element indicates the program is effective in preventing and reducing the discharge of pollutants in storm water run-off. Staff completed required inspections of municipal facilities. An updated municipal inventory can be found in the SWMPP. Approximately 2,376 bags of floatable materials were removed from the MS4. There are no proposed revisions at this time.

3.8 Application of Pesticides, Herbicides and Fertilizers (PHFs)

3.8.1 Objective

The objective of the PHF Program is to reduce, to the maximum extent practicable, the discharge of pollutants related to the storage and application of PHFs applied by employees or contractors, to public rights of way, parks, and other public property.

3.8.2 Activities Complete or in Progress

Activity 1: Identify all areas known to receive high application of PHFs and develop a program to detect improper usage. This activity is complete.

Activity 2: Require evidence of proper certification and licensing for all applicators. This activity is complete.

Activity 3: Maintain an inventory of on-hand PHFs with information about the formulation of the product. This activity is complete.

Activity 4: Maintain information on equipment use and maintenance. This activity is complete.

Activity 5: Have training on safe usage, storage and disposal of PHFs. This activity is complete.

Activity 6: Inspect and monitor facilities where PHFs are stored. This activity is not applicable.

Activity 7: Have recordkeeping. This activity is in progress.

3.8.3 Annual Reporting

The City has identified areas that receive application of PHFs and the amounts of application are documented. These records are kept by contractors providing these services for the City. Responsible personnel/contractors are certified in the application of PHFs and maintain an inventory of products including formulation information. Equipment used is maintained as needed with documentation of service. Essential staff receive training on proper usage, storage and disposal of PHFs. PHF storage facilities are inspected as required.

Status of this element is in progress.

Assessment of this element is effective in reducing discharge of pollutants related to the storage and application of PHFs applied by employees or contractors. Areas of application include sports fields, parks, medians and other municipal facilities. Records of applied amounts are kept by contractors providing these services; timely delivery of these reports to the City are being improved.

3.9 Oils, Toxics, and Household Hazardous Waste Control

3.9.1 Objective

The objective of oil, toxics and household hazardous waste control program is to prohibit, to the maximum extent practicable, the discharge of hazardous waste into the MS4.

3.9.2 Activities Complete or in Progress

Activity 1: Making educational materials on this program available to the public. This activity is complete.

Activity 2: Advertise the location of used oil collection facilities. This activity is complete.

Activity 3: Provide employee training on spill prevention related to this program. This activity is complete.

3.9.3 Annual Reporting

Educational materials are available to the public at city hall, the inspections office and on the webpage. Locations of oil collection facilities are included in a storm water calendar and on the webpage. Spill prevention training is provided to employees involved in this activity.

Status of this element is complete.

Assessment of this element shows the program is effective. Information regarding oils, toxics, and household hazardous waste control is provided via printed and digital formats. A county wide household hazardous waste event was held on April 13, 2024. During this event a total of 122.6 tons of waste materials were collected. Birmingham Water Works included an announcement of the event on its billing insert. Additionally, three other electronic take back and paper shredding events were held which collected a total of over 34.7 tons. The City also hosted two events for Hazardous Waste Collection and E-Recycle. One event was held at Liberty Park/Sicard Hollow on May 11, 2024 and one at City Hall on September 14, 2024. These events received 11.35 tons of hazardous waste, 6,900 pounds of recyclable electronics, 12,500 pounds of shredded paper, and 96 pounds of medications. See Appendix H for a report of these events. Universal Environmental Services reported 545,650 gallons of used oil were received from Jefferson County area Express Oil Change Services, Inc., during this reporting period. Amounts for individual cities were not available. Spill prevention training was attended by 21 employees (see **Appendix H**). No revisions are proposed at this time.

3.10 Industrial Storm Water Runoff

3.10.1 Objective

The objective of the industrial storm water runoff program is to inspect, monitor, and control pollutants in the storm water runoff from high-risk facilities.

3.10.2 Activities Complete or in Progress

Activity 1: Annual inspection of Municipal waste landfills, hazardous waste treatment, storage, disposal (TSD) and recovery facilities. This activity is not applicable.

Activity 2: Annual inspections of industrial facilities and high-risk commercial facilities. This activity is complete.

Activity 3: Use data collected from NPDES permitted facility to review sites. This activity is complete.

3.10.3 Annual Reporting

The City does not have any municipal waste landfills, hazardous waste treatment storage, disposal or recovery facilities. Annual inspections of industrial facilities and high-risk commercial facilities are completed by JCDH on behalf of the City. JCDH also uses Discharge Monitoring Reports (DMR) to review NPDES permitted facilities.

The status of this element is complete.

Assessment of this elements shows there are 17 sites identified by the City as industrial and high-risk commercial facilities. Inspections were completed on 16 of the sites and one of the sites were NPDES permitted. DMRs were reviewed for this site. There were no instances of exceedance. The inspections and DMR reports can be found in **Appendix I**. There are no proposed revisions at this time.

3.11 Monitoring Program

3.11.1 Objective

The objective of the Monitoring Program is to provide data necessary to assess the effectiveness and adequacy of BMPs implemented under the SWMPP.

3.11.2 Annual Reporting

Monitoring is accomplished by collecting grab samples from identified waterbodies at the frequency determined by the City's permit with any rainfall data and associated weather conditions recorded. Samples are tested for the 17 parameters described in the permit. The sampling site locations are based upon multiple factors that include, past sampling sites for longevity studies of water quality and ease of access. The continuous monitoring station is identified as Cahaba River Near Mountain Brook – 02423380, is also a grab sample site VES-CAR-085M. This station is maintained, calibrated, and the data approved by USGS. The data is available to the public through USGS's website (https://www.usgs.gov/). The monitor tests for six parameters: temperature, turbidity, conductivity, dissolved oxygen and water level (discharge). Analysis of the sampling data is used to assess the water quality of the streams and to identify potential water quality impairments.

The table below describes the sites that receive runoff from the City.

WATERSHED	ADEM PERMIT REQUIREMENTS	SITE NAME	LONGITUDE	LATITUDE	APPROXIMATE WATERSHED SIZE (SQ. MI.)*
CAHABA RIVER	CAHABA RIVER	VES-CAR-085M	-86.712765	33.481772	140.3
CAHABA RIVER	PATTON CREEK	VES-CAR-074T	-86.810525	33.410772	6.7

^{*}The watershed size was derived from the United State Geological Survey's (USGS) Watershed Boundary Dataset in conjunction with USGS topographical maps. The information shown is an approximation of watershed size.

JCDH collected samples for both sites. Overall, values reflect levels that are expected during dry conditions. Test results indicate the water quality has remained relatively constant.

Additionally, JCDH has accumulated data through a Fish Bioassessment Study (Study) which has been a valuable longitudinal study in determining the water quality of the watersheds within SWMA municipalities. The Study has been in existence since the fall of 2010. Each major stream has two sites; one located high in the watershed and one located lower in the watershed. The procedures used for capturing fish are electrofishing and seining. After processing, all of the fish were released back into the stream. Some of the criteria used to determine the health of a stream include the number of fish species present, the species percentage of the total number present and a physical habitat assessment. The major finding of this study is that no significant trends in water quality have been identified. Therefore, the health of the streams appears to be stable with no signs of improvement or degradation over the length of the study. See **Appendix J** for the Study.

The table below show grab sample data taken during dry conditions for the 2023-2024 reporting period. The minimum and maximum values represent 12 years of wet and dry sampling.

4 Fiscal Analysis

For the Permit year 2023-2024, SWMA was paid based on a \$5.00 per residence and \$15.00 per commercial rate by each member according to land usage. In accordance with Act 2014-439, Alabama Department of Revenue received 5% of the storm water fee collected.

The money collected by SWMA was used to help members meet ADEM permit requirements. The most recent fiscal information available is included in **Appendix K**.

Signatory and Certification Requirements:

I certify under the penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the persons who manage the system, or those persons directly responsible for gathering the information the information is to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

AGREEMENT

Jefferson County Board of Health
And the
Storm Water Management Authority, Inc.

THIS AGREEMENT, made this first day of January, 2017, by and between the Jefferson County Board of Health, "Board", and The Storm Water Management Authority, Inc. and its Board of Directors hereinafter referred to as "SWMA".

WITNESSETH:

WHEREAS, the Board is a county board of health constituted under the laws of the State of Alabama and provides the sanitary and public health work as Jefferson County Department of Health ("Department") under supervision of its county health officer.

WHEREAS, SWMA is a public corporation incorporated pursuant to the Storm Water Act, Code of Alabama (1975), §§ 11-89C-1, et seq. (the "Storm Water Act") and composed of member municipalities that are required to comply with certain Storm Water Laws as defined by Code of Alabama (1975), § 11-89C-2(8), including, but not limited to the federal Clean Water Act of 1972, 33 U.S.C. §§ 1251, et seq., as amended ("CWA") and NPDES Permits ("Permits") issued to SWMA's member municipalities by the Alabama Department of Environmental Management ("ADEM");

WHEREAS, SWMA is incorporated to assist its member municipalities in complying with their obligations under the Storm Water Laws and the Permit and for that purpose performs certain functions on behalf of its members;

WHEREAS, SWMA, in an effort to comply with its members' obligations under the Permit, undertakes to monitor various sites in the field that have been identified and approved by ADEM and the Environmental Protection Agency ("EPA");

WHEREAS, it is the intent of the Board and SWMA that the Board will provide the storm water management services for the member municipalities of SWMA, other than those services expressly excluded.

NOW, THEREFORE, in consideration of the premises, the mutual promises and covenants of the parties other good and valuable consideration the parties agree:

I. PROVISION OF SERVICES BY THE BOARD

A. The Department agrees to provide the following services to SWMA (the "Services"):

- Wet Weather Monitoring The Department will monitor, sample, and provide lab analysis for the monitoring component as directed by the Municipal Separate Storm Sewer System ("MS4") Permits.
- 2. MS4 Outfall Screening The Department will sample and provide lab analysis to meet 100% of MS4 outfalls within the five year permit cycle.
- 3. Illicit Discharge/Illegal Dumping Inspection The Department will provide field inspections, sampling and lab analysis for dry weather screening for detection of illicit discharges/illegal dumping into the MS4. Provide enforcement assistance to remediate illicit discharges and illegal dumping as determined during these inspections.
- 4. Complaint Investigations The Department will investigate all storm water complaints and record all investigations electronically so that a comprehensive report can be provided at any time. Records will be kept in such a manner as to provide documentation should legal proceedings be necessary. The Department will assist member jurisdictions with any necessary enforcement actions.
- 5. Complaint Reporting System The Department will provide a day time complaint reporting system, a night time, and weekend hot line as well as a 24-7 web based reporting system for the public to report illegal discharges or illegal dumping into the MS4.
- 6. Household Hazardous Waste Disposal The Department will assist any jurisdiction member with the set up and operation of Household Hazardous Waste disposal projects.
- 7. Erosion and Sediment Control Inspections The Department will assist with pre-, ongoing, and post-construction inspections as related to the enforcement of erosion and sediment control requirements per the approved best management practices. The Department will notify member jurisdictions in a timely manner of any verified permit violations.
- 8. Erosion and Sediment Control Workshops The Department will conduct a minimum of one erosion and sediment control workshops to inform builders of the usage and importance of BMPs on local construction sites.
- 9. Classroom Education The Department will develop and present age appropriate (elementary through high school) education on water quality and storm water runoff protection to local (public and private) classrooms in the member jurisdictions at a minimum of one time per year. The Department will provide educational materials and teacher resources.

- 10. Public Education The Department will deliver technical and professional presentations on the storm water management program elements and reduction of non-point source pollutants to professional and nonprofessional groups. The Department will also produce and distribute professional informational publications for public education in member jurisdictions.
- 11. Public Education/Information Online The Department will provide web based access to storm water issues/information, educational materials, assistance guides on the Department's website.
- 12. Water Quality Inventory The Department will continue to update the hydrographic layers of the existing GIS database for each member jurisdiction. Where possible through aerial photography, existing survey information, derived planimetric features, and field data collection, the Department will work to increase the spatial and attribute accuracy of the existing mapped information. Including the collection and integration of data as required by the Permits.
- 13. Industrial Storm Water Runoff The Department will implement a program to inspect and monitor storm water runoff to the MS4 from industrial or commercial sites as required in the Permits. Additional sites may be inspected upon request of the Permittees.
- 14. Full Cooperation with SWMA The Department will fully cooperate with SWMA by providing information and documentation as more fully set forth in paragraph 7.
- 15. The Department will be responsible for preparation of the Annual Report to ADEM which is required pursuant to the Permits.
- 16. Permitting The Department will provide administrative support to implement NPDES permit requirements.

B. **EXCLUDED SERVICES:**

SWMA and Department agree to exclude from services the issuance of any permits pursuant to the Erosion & Sedimentation Control Ordinances adopted by SWMA's members in approximately 1999 or any enforcement actions related to such permits.

II. OBLIGATIONS OF SWMA; PAYMENT TERMS

- A. SWMA's obligations under this Agreement (the "Obligations") are as follows:
 - 1. Without cost to SWMA, fully cooperate with the Department in the performance of the Department's Services stated herein.
 - 2. All water sampling data, GIS data and storm water related documentation will be returned to SWMA upon termination of the Agreement at no cost to SWMA.
- B. SWMA shall pay the Department for the Services performed hereunder as follows:
 - 1. The total amount for the annual contract term payable by SWMA to the Department shall be \$644,000.00 (the "Annual Contract Amount") to be paid in equal monthly installments. SWMA shall remit payment in advance for the Services on the 1st business day of each month in the amount of 1/12 of the Annual Contract Amount (\$53,666.67) beginning January 1, 2016.

III. TERM OF AGREEMENT

The term of this Agreement shall be from January 1, 2017 through December 31, 2017 unless terminated sooner by the parties as provided herein. This Agreement shall renew automatically at the end of each term for a period of one year beginning on January 1 of the year of renewal and ending December 31 the following year unless terminated sooner by the parties as provided herein.

IV. TERMINATION

At any time during the term of this Agreement, this contract may be terminated by either party by giving ninety (90) days written notice to the other party

V. NOT DEBT OF STATE

It is agreed that the terms and commitments contained herein shall not be constituted as a debt of the State of Alabama in violation of Article 11, Section 213 of the Constitution of Alabama of 1901, as amended by Amendment Number 26. It is further agreed that if any provision of this contract shall contravene any statute or Constitutional provision or amendment, either now in effect or which may, during the course of this contract, be enacted, then that conflicting provision in the contract shall be deemed null and void. SWMA's sole remedy for claims for damages arising from any breach of this Agreement or failure to perform this Agreement shall be limited to the filing of a claim with the Board of Adjustment for the State of Alabama.

VI. CIVIL SERVICE SYSTEM

The Board and SWMA acknowledge that the Board is an appointing authority under the Civil Service System of Jefferson County, Alabama (the "System") and that the Board's Services hereunder are subject to said System.

VII. RECORDS AND DOCUMENTS

- A. Upon written request by SWMA, the Department will promptly provide to SWMA such reports, documents, information, and any other similar materials generated by the Department under this Agreement.
- B. Unless required by law, the Department will not use any confidential or proprietary reports, documents or information developed during performance of the Services for any purpose other than the performance of such services without the prior written consent of SWMA.
- C. The Department will maintain records and documents relating to performance of the Services hereunder for a period of not less than five (5) years after completion of the Services or such longer period as may be required by ADEM or EPA. Should the Department thereafter determine that it will no longer retain such records or documents, then sixty (60) days prior to disposing of such records and documents, the Department will notify SWMA of the impending termination of storage, and request that SWMA take delivery of such records and documents. If requested, the Department will deliver copies of such requested documents to SWMA at no cost to SWMA.
- D. Notwithstanding the provisions of subsection VII.C., the Department will not destroy or discard data or information contained within the GIS database to which the Department is provided access unless in the normal course of business and agreed upon in writing by the Department and SWMA.

VIII. NON-EXCLUSIVITY

This Agreement shall not be construed to grant the Department an exclusive right to perform work or provide services to SWMA. SWMA reserves the right to contract with other parties for such services as it deems appropriate.

IX. ASSIGNMENT

The Department shall not assign any of its rights or obligations under this Agreement without the prior written consent of SWMA. This Agreement is binding on the successors and assigns of SWMA and the Department.

X. GOVERNING LAW

The validity and enforceability of this Agreement and every term or provision, as well as the rights and duties of the parties to this Agreement will be governed by the laws of the State of Alabama.

XI. NOTICE

Any information or notices required or permitted under this Agreement shall be deemed to have been sufficiently given if in writing and sent by first-class mail or overnight delivery to the following:

For the Board:

Jefferson County Board of Health Attn: Dr. Mark E. Wilson, M.D. 1400 6th Avenue South Birmingham, AL 35233

For SWMA:

Storm Water Management Authority, Inc. Attn: Mayor Jerry Brasseale 501 Park Road Pleasant Grove, AL 35217

XII. AMENDMENT

This Agreement may not be amended except by a written agreement executed by the parties.

XIII. <u>ENTIRE AGREEMENT</u>

This Agreement constitutes the entire understanding and agreement between the parties relating to the subject of this Agreement and supersedes all prior agreements, whether written or oral.

XIV. SEVERABILITY

If any portion of this Agreement is determined to be illegal, invalid, or unenforceable, such illegality, invalidity or unenforceability shall not affect any other portion of this Agreement.

XV. SURVIVAL

All covenants, indemnities and other agreements of the parties in this Agreement (or given with this Agreement) shall survive termination of this Agreement.

XVI. HEADINGS

Headings and subheadings are inserted only for convenience and are in no way to be construed as a part of this Agreement or as a limitation of the sections to which they refer.

XVII. <u>COUNTERPARTS</u>

This Agreement may be executed simultaneously in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

IN WITNESS WHEREOF, the parties have caused this Agreement to be signed by their duly authorized representatives as of the date first above written:

AMENDMENT

Between the Jefferson County Board of Health And the Storm Water Management Authority, Inc.

This Amendment, effective the 1st day of June, 2019 (the "Amendment"), by and between the Jefferson County Board of Health, hereinafter referred to as "Board", and The Storm Water Management Authority, Inc. and its Board of Directors, hereinafter referred to as "SWMA", hereby amend the Agreement entered into between the parties in January 1, 2017 (the "Agreement").

WITNESSETH:

WHEREAS, the Board and SWMA wish to renew the Agreement entered between the parties January 1, 2017, subject to the amendments noted below.

NOW, THEREFORE, in consideration of the premises, mutual promises, and covenants of the parties contained herein and other good and valuable consideration, the parties hereby amend Section II B of the Agreement, titled **OBLIGATIONS OF SWMA; PAYMENT TERMS**, as follows:

Delete the following Section II B 1:

"The total amount for the annual contract term payable by SWMA to the Department shall be \$644,000.00 (the "Annual Contract Amount") to be paid in equal monthly installments. SWMA shall remit payment in advance for the Services on the 1st business day of each month in the amount of 1/12 of the Annual Contract Amount (\$53,666.67) beginning October 1, 2016."

And, substitute in lieu thereof the following as Section II B 1:

"The total remaining balance of the 2019 year payable by SWMA to the Department shall be \$379,169.00 (the "Remaining Contract Amount") to be paid in seven equal monthly installments. SWMA shall remit payment in advance for the Services on the 1st business day of each month in the amount of 1/7 of the Remaining Contract Amount (\$54,167.00) beginning June 1, 2019.

And, to insert the following as Section II B 2:

"The total amount for the annual contract term payable by SWMA to the Department for the year 2020 shall be \$650,000.00 (the "Annual Contract Amount") to be paid in twelve monthly installments. SWMA shall remit payment in advance for the Services on the 1st business day of each month in eleven monthly payments of \$54,167.00 and one monthly payment of \$54,163.00 beginning January 1, 2020."

All other terms and conditions of the Agreement shall remain in full force and effect.

IN WITNESS WHEREOF, the parties have caused this Amendment to be signed by their duly authorized representatives as of the date first above written:

JEFFERSON COUNTY BOARD OF HEALTH

Health Officer

STORM WATER MANAGEMENT AUTHORITY, INC.

By: Oshley C. Curry
Ashley Curry, Mayor Vestavia

Chairman of the Board of Directors

INAL DRAFT 9/08/1998

BYLAWS OF THE STORM WATER MANAGEMENT AUTHORITY, INC.

Section 1. Name. The name of this organization shall be the Storm Water Management Authority, Inc. ("Authority").

Section 2. Objectives and Purposes. The objectives and purposes of the Authority shall be to serve as a public corporation pursuant to Act No. 95-775, Legislature of Alabama 1995, as codified from time to time in the Code of Alabama §§ 11-89C-1 et seq. (the "Act"), and to assist the member governing bodies in carrying out implementation of the storm water laws and in undertaking the responsibilities of, and achieving and maintaining compliance with, the National Pollutant Discharge Elimination System ("NPDES") MS4 Permit ALS000001 (as the same may be hereafter extended, modified, or renewed, the "Permit") issued by the Alabama Department of Environmental Management ("ADEM"), and to do all things necessary or convenient to achieve such purposes.

Section 3. Membership. Membership in the Authority shall be open to each "governing body" as defined in the Act which elects to join the Authority, to abide by these Bylaws, and to be a co-permittee under the Permit.

Section 4. Board of Directors.

a. The business of the Authority shall be managed by its Board of Directors, consisting of one representative from each member governing body. The representative shall be the Mayor, if the member governing body is a governing body of a municipality, or a County Commissioner, if the member governing body is a governing body of a county.

- 9/08/1998 b. The Board of Directors may hold its meetings and have one or more offices and keep the books of the Authority at such places within the boundaries of any member governing body as the Board may, from time to time, determine.
 - c. In addition to the powers and authorities by these Bylaws expressly conferred upon it, the Board of Directors may exercise all such powers of the Authority and do all such lawful acts and things as are by statute or by the certificate of incorporation granted to them.
 - d. No member of the Board of Directors shall receive compensation for his or her services rendered as a member of the Authority but each member shall be entitled to receive reimbursement for his or her reasonable actual expenses incurred in the performance of his or her duties as a member of the Board of Directors, which expenses are consistent with the budget, properly documented and approved by the Chair of the Board of Directors of the Authority. A maximum amount of expenses for each event or project for which a member of the Board of Directors seeks reimbursement shall be subject to the approval of the Chair of the Board of Directors in advance of such event or project, and the actual expenses shall also be subject to the approval of the Chair of the Board of Directors after they are incurred and before reimbursement of them is made.
 - e. Because under the Act each governing body is represented by a member who is a Mayor or County Commissioner, and because of the press of duties attending such elective office, and in order to prevent the Board of Directors from being unable to conduct its ordinary business when the conflicting and multiple duties of the members make their attendance at meetings difficult, any member of the Board of Directors may designate an

alternate to represent such member at meetings of the Board of Directors; provided, however, that such designation must be made separately for any given meeting, must be made in writing signed by the member so represented, and must state whether the alternate may vote at such meeting on items in the published agenda. Such designation shall be attached to the minutes of the meeting. An alternate with voting power shall be counted for purposes of determining a quorum, and may vote on agenda items, except that alternates may not vote on the adoption of Rules as defined herein. Where an alternate is authorized to cast a vote concerning amendment of Bylaws or election or removal of officers, the designation shall specify that the alternate is so authorized. An alternate may be another member or a non-member, but no person shall act as alternate for more than one (1) member at any given meeting. Also, in the event of absence or disability of a Mayor and consistent with Code of Alabama (1975) § 11-43-42, providing for the exercise of the functions of Mayor during a Mayor's absence or disability, the Mayor pro tempore or chairman pro tempore of a governing body may cast the vote of a governing body as provided in § 11-43-42.

f. It shall be the policy of the Authority to require and enforce ethical standards of conduct. Members of the Board of Directors, and employees of the Authority, shall comply with the code of ethics for public officials and employees set forth in Code of Alabama (1975) § 36-25-1 et seq., as amended from time to time, and rules and regulations promulgated thereunder. The Board of Directors shall require procedures consistent with § 36-25-1 with respect to matters including but not limited to reimbursement of expenses, and business dealings and contracts of the Authority.

Section 5. Meetings of the Board of Directors.

- a. The annual meeting of the Board of Directors shall be held on the second Thursday in September of each year, to elect the Executive Committee and its officers in applicable years, to consider and approve the Authority's budget for the following fiscal year, and to receive the report of the Authority's activities for the current fiscal year. The semi-annual meeting of the Board of Directors shall be held on the second Thursday in March to review and approve the method of funding.
- Committee. The Executive Committee shall include one member who is a County Commissioner from the largest county participating in the Authority, one member who is the Mayor of the largest city participating in the Authority, and three other members. The Board of Directors shall elect one member of the Executive Committee as Chair, one member as Co-Chair, and one member as Secretary. The Chair, Co-Chair, and Secretary of the Executive Committee shall also serve as the Chair, Co-Chair, and Secretary, respectively, of the Board of Directors. No alternate shall be designated for Executive Committee meetings.
- c. Other regular meetings of the Board may be held without public notice (except as may be specifically required by statute) at such time and place as shall be determined from time to time by the Board. The Chair of the Board shall notify the members of the date, hour, and site for the meeting, in writing, not less than ten (10) days prior thereto.
- d. Except as may be specifically required by statute, special meetings of the Board may be called by the Chair, or by any two members of the Board, on one day's notice to each member of the Board (if by facsimile, by phone, in person, or by written notice hand-delivered) or 72 hours notice if by U. S. Mail. If a member of the Board does not receive

such notice, but does attend the special meeting, his or her presence at the special meeting shall satisfy the notice requirement as to such member unless the sole purpose of his or her attendance at the meeting was to protest the manner in which (or purpose for which) it was called.

- e. At all meetings of the Board, one-third of the members thereof or designated voting alternates (initially this number is eight) shall be necessary and sufficient to constitute a quorum for the transaction of business. The Chair may vote on all matters. The act of a majority of the Board present at any meeting at which there is a quorum shall be the act of the Board, except as otherwise provided in sections 7 and 13 hereof.
- f. The Chair of the Board of Directors shall appoint a Nominating Committee from the members of the Board of Directors. The Nominating Committee shall make recommendations to the Board for the election of members to the Executive Committee, and for the election of officers thereof.
- oversee the executive and administrative functions of the Authority. The Executive Committee shall hold regular quarterly meetings on the second Thursday of March, June, September and December, as well as other meetings which may be called hereunder. The Chair may vote in meetings of the Executive Committee. Day-to-day management of the Authority shall be handled by the administrator of the Authority. The Executive Committee shall receive reports from time to time from the Chair and from the administrator concerning day-to-day operations of the Authority, including such matters as employment of personnel, coordination of activities connected with the Permit, maintenance of records, and provision of assistance to member governing bodies in connection with Permit compliance and related activities. The administrator

shall develop recommendations for action by the Executive Committee, and, on issues requiring . . . Board action, for recommendation by the Executive Committee.

The terms of the members of the Executive Committee shall be three years, beginning on October 1 of the year in which elected to the Executive Committee, with staggered terms. To implement such staggered terms, from the date of election by the Board,

--The initial terms of the first Chair ("first member") and Co-Chair ("second member") of the Executive Committee shall be three years.

--The initial terms of the first Secretary ("third member") and the fourth member shall be two years.

--The initial term of the fifth member of the Executive Committee shall be one year.

Upon expiration of each term, the Board of Directors shall receive recommendations from the Nominating Committee and shall elect new officers for the Executive Committee. Vacancies occurring in the Executive Committee shall be filled by the Board of Directors of the Authority.

Action may be taken by the Executive Committee without a meeting, provided all committee members are notified twenty-four (24) hours in advance of any polling or action and there is consent of a majority of the membership of the Executive Committee. Such consent shall be confirmed in writing within seventy-two (72) hours of such decision.

The Executive Committee shall report its activities and transactions at the next following regular meeting of the Board of Directors.

Without limiting the authority of the Executive Committee, said Committee shall have the following specific authority, with such additional authority as is necessary to implement the performance of the following activities:

- a. To engage personnel or services deemed necessary to perform the function of the Authority, consistent with the approved budget, under such terms and conditions as it shall prescribe;
- b. To organize the Board of Directors into such committees or other groups as will in its judgment serve to efficiently accomplish the purposes or ends for which the Authority was established and created under law (such committees may include, in an advisory capacity, persons other than members of the Board of Directors);
- c. To designate such programs of study and research as will promote the purposes for which the Authority was established and created;
- d. To publish such records, reports or findings, in writing, as may in its judgment be of use or value to the public or other interested party or parties;
- e. At the annual meeting of the Board in each fiscal year, the Executive Committee shall provide a summary of the Authority's activities during the current calendar year;
- f. To make application for and to accept on behalf of the Authority any funds, gifts, donations, assistance or governmental grants, under such conditions as it shall deem appropriate, not inconsistent with the power of the Authority, as prescribed by law;
- g. To recommend, not later than the March quarterly meeting of each fiscal year, the proposed fee structure method and the approximate amount of revenue to be collected by the method selected, for the following fiscal year, and, no later than the June quarterly meeting of each year, the Authority's annual budget for the following fiscal year, in order that member governing bodies may adopt and transmit any revised instructions concerning

fees for the following fiscal year to the Tax Assessor and Tax Collector by no later than July . 31 of the current fiscal year (as directed by the Tax Collector).

Matters not delegated to the Executive Committee, including election of officers, amendment of the Bylaws or Articles of Incorporation, rulemaking procedures, and approval of the annual budget, shall be determined by the Board of Directors.

Section 7. Rulemaking Procedures. As used herein, "Rule" shall have the meaning set forth in §11-89C -2(6) of the Act, as the same may be from time to time amended. As of the date of adoption of these Bylaws, "Rule" means any regulation or standard of general applicability of the Authority which prescribes or recommends law, procedure or policy to be adopted by the member governing bodies of the Authority, specifically including all pro forma ordinances, regulations, resolutions, rules, procedures or remedies for such member governing bodies. In development of any Rule of the Authority, or procedures for the enforcement of such, the Authority shall follow the procedures set forth in the Act in §11-89C-4(b), as the same may be from time to time amended. As of the date of adoption of these Bylaws, the Act requires that the Authority's procedures include all of the following:

a. Set a date and time for a public hearing and afford the public and interested parties an opportunity to offer written comments, and to present testimony and evidence in support of their respective positions as to the proposed resolutions, ordinances, remedies, or procedures, and to have counsel to represent them at their own expense. The Board of Directors shall consider fully all written and oral submissions presented. At the conclusion of the public hearing and any continuation thereof, the Board of Directors may modify or withdraw such proposals, or may adopt such pro forma resolutions, ordinances,

remedies, or procedures which are reasonable and supported by evidence from the proposal itself, the public comments submitted thereupon and the public hearing record and which shall be thereafter presented to the member governing bodies for their consideration. Adoption of any Rule shall require an affirmative vote of at least two thirds (2/3) (initially this number is sixteen) of the members of the Board of Directors. Upon adoption of a Rule, the Authority shall issue a statement reflecting the reasoning and evidence supporting adoption of the Rule and an explanation for rejecting the evidence or assertions made urging that the Rule be modified or not adopted.

- b. Give notice of the hearing by publishing in a newspaper of general circulation published within the counties in which the member governing bodies exist, at least 30 days prior to the date of the hearing, stating the date, time and location of the hearing, and including either the terms or the substance of the proposals to be considered or a description of the subjects and issues involved, the address of the location where copies of the proposed resolution, ordinances, remedies and procedures may be inspected or copies thereof obtained, and the manner in which interested persons may present their views thereon. Every proposed Rule shall be accompanied by a thorough statement identifying and explaining the purpose and support for its adoption. The notice shall also be mailed to all persons who pay in advance the cost of the mailing and who have made timely request of the corporation in advance for advance notice of any such hearings.
- c. Make available for public inspection and copying, at a charge of \$.25/page or such amount as the Executive Committee may establish from time to time, any

such proposed resolutions, ordinances, remedies, and procedures at least thirty (30) days prior . . to the hearing.

Section 8. Officers. The officers of the Authority shall hold office until their successors are chosen and qualified in their stead. No member shall simultaneously hold than more than one office (Chair, Co-Chair, Secretary). Any officer elected or appointed by the Board may be removed at any time by the affirmative vote of two-thirds of the members of the Board. Their duties shall be as follows:

Chair. The Chair of the Executive Committee is also Chair of the a. Board of Directors. He/she shall preside at all meetings of the Board and see that all orders and recommendations of the Board are carried into effect. The Chair shall be available for the administrator to consult between meetings of the Executive Committee, in order to carry out the day-to-day management of the Authority. Decisions reached as a result of such consultation shall be reported to the Executive Committee at its next meeting. The Chair shall execute all contracts of the Authority. The Chair shall recommend appointments to all committees of the Authority, except the Executive Committee, subject to the approval of the Executive Committee. The Chair shall oversee or provide for recordation of minutes of all proceedings of the Board of Directors and Executive Committee in book(s) to be kept for that purpose. The Chair shall give, or cause to be given, notice of all meetings of the Board. The Chair shall also keep in safe custody the seal of the Authority and shall affix the same to any instrument requiring it and shall attest it. The Chair shall be the custodian of all funds of the Authority and shall withdraw and expend the same from time to time in accordance with the budget approved by the Board of Directors. He/she shall perform such other duties as may be prescribed by the Board.

- b. Co-Chair. The Co-Chair of the Board of Directors shall have the same powers and duties as the Chair except that he/she shall exercise such powers and duties, and preside at meetings of the Board, only in the absence of or unavailability of the Chair. The signature of either the Co-Chair or the Chair on contracts, bonds and obligations of the Authority shall be sufficient.
- c. Secretary. The Secretary of the Board of Directors shall be an officer of the Board and shall preside at meetings in the absence of the Chair and Co-Chair.
- Section 9. Duties of Officers May Be Delegated. In case of the absence of any officer of the Authority or for any other reason that the Board may deem sufficient, the Board may delegate, for the time being, the powers and duties, or any of them, of such officer, to any other officer, provided that a majority of the entire Board concur therein.

Section 10. Funds and Checkwriting Authority.

- a. The Authority may enter into an agreement with the Jefferson County Finance Department to act as custodian of the Authority's funds and to write such checks, transfer such funds and make such payments as may be directed pursuant to such agreement. The Authority may in such agreement specify procedures for authorization of such checks, transfers and payments by designated officer(s) and/or employees of the Authority.
- b. The Authority may not make gifts, donations, or contributions to any person, firm, corporation, association or any other entity.
- Section 11. Fiscal Year. The fiscal year shall begin on October 1 and end on September 30 of the following year. The fee structure for each member governing body shall

be adopted by the Authority no later than March 31 of each year. The Authority's annual budget for the upcoming fiscal year shall be approved by September 15 of each year.

Section 12. Notices.

- a. Whenever, under the provisions of these Bylaws, notice is required to be given to any member of the Board of Directors, such notice may be given to him/her in person, by mail, by telephone, by facsimile transmission, or by certified or registered mail mailed to his/her address as it appears in the records of the Authority.
- b. Any member of the Board of Directors may waive any notice required to be given under these Bylaws, either before or after the meeting of which notice is required to be given. Such waiver shall be confirmed in writing.
- Section 13. Amendments. These Bylaws may be altered or amended by the affirmative vote of a majority of the members of the Board of Directors at any regular meeting of the Board, or at any special meeting of the Board if at least ten (10) days' notice is provided of the proposed alteration or amendment in the notice of such meeting.
- Section 14. Seal. The Authority's seal shall have inscribed thereon the name of the Authority and the words "CORPORATE SEAL".
- Section 15. Parliamentary Procedures. In all cases (1) where not inconsistent with these Bylaws and any special rules of order the Authority may adopt, and (2) where applicable, the rules contained in the current edition of Robert's Rules of Order, Newly Revised, shall govern the Authority.

Section 16. Member Governing Bodies.

- a. Adoption of Ordinances and Resolutions. To maintain membership herein, a member governing body shall adopt such ordinances and resolutions as may be adopted by the Authority as Rules following the rule-making procedure described herein. Each member governing body shall satisfy all statutory requirements applicable to it for adoption of ordinances or resolutions, as applicable, before adopting any such Rule. Adoption by a member governing body of any ordinance or resolution recommended by the Board or authorized by the Act shall require an affirmative vote of at least a majority of the members of the council or commission authorized to adopt such ordinances or resolutions in the governing body.
- b. Financial Support. Each member governing body shall, no later than July 31 of an applicable year, adopt and forward to the Authority and to the Jefferson County Tax Collector an ordinance and/or resolution directing the Jefferson County Tax Collector to collect and to forward, during the upcoming fiscal year, such member governing body's required annual financial support (pursuant to the fee structure voted by the Authority) for the upcoming fiscal year to the Authority. The administrator shall provide to the Board, quarterly in December, March, June and September of each year, information provided by the Tax Collector on the payments collected on behalf of each member governing body.
- c. Continued Membership. Members of governing bodies shall follow all Rules, pro forma ordinances and resolutions, and enforcement procedures adopted by the Board of Directors, in order for the Authority to achieve a uniform, consistent and cost-effective stormwater program. Deviation from such Rules, pro forma ordinances and resolutions and enforcement procedures will result in termination of such member governing body from membership in the Authority, pursuant to procedures to be adopted by the Board of Directors

and which shall provide notice of such deviation and a reasonable opportunity to comply. Such procedures may be adopted as an amendment to these Bylaws. In the event of such termination, the Executive Committee shall determine the amount of any refund to be provided to such terminated member governing body from fees collected by the Tax Collector on behalf of such member governing body.

Section 17. Membership and Withdrawal.

- a. The members of the Authority are, as of the date of adoption of these Bylaws: the City of Adamsville, the City of Bessemer, the City of Birmingham, the City of Brighton, the City of Brookside, the City of Fairfield, the City of Fultondale, the City of Gardendale, the City of Graysville, the City of Homewood, the City of Hoover, the City of Hueytown, the City of Irondale, the City of Leeds, the City of Lipscomb, the Town of Maytown, the City of Midfield, the City of Mountain Brook, the City of Mulga, the City of Pleasant Grove, the City of Tarrant, the City of Trussville, the City of Vestavia Hills, and the Jefferson County Commission.
- b. A member governing body which desires to withdraw from the Authority must provide notice of such withdrawal by adopting an ordinance or resolution, in accordance with law, no later than January 15 of a fiscal year, which notice shall become effective on October 1 of the next year.
- c. A governing body as defined in the Act which desires to join the Authority and to comply with all requirements for membership as set forth herein shall, no later than January 15 of a fiscal year, adopt in accordance with law and submit to the Board of Directors an ordinance or resolution in form satisfactory to the Board of Directors, requesting

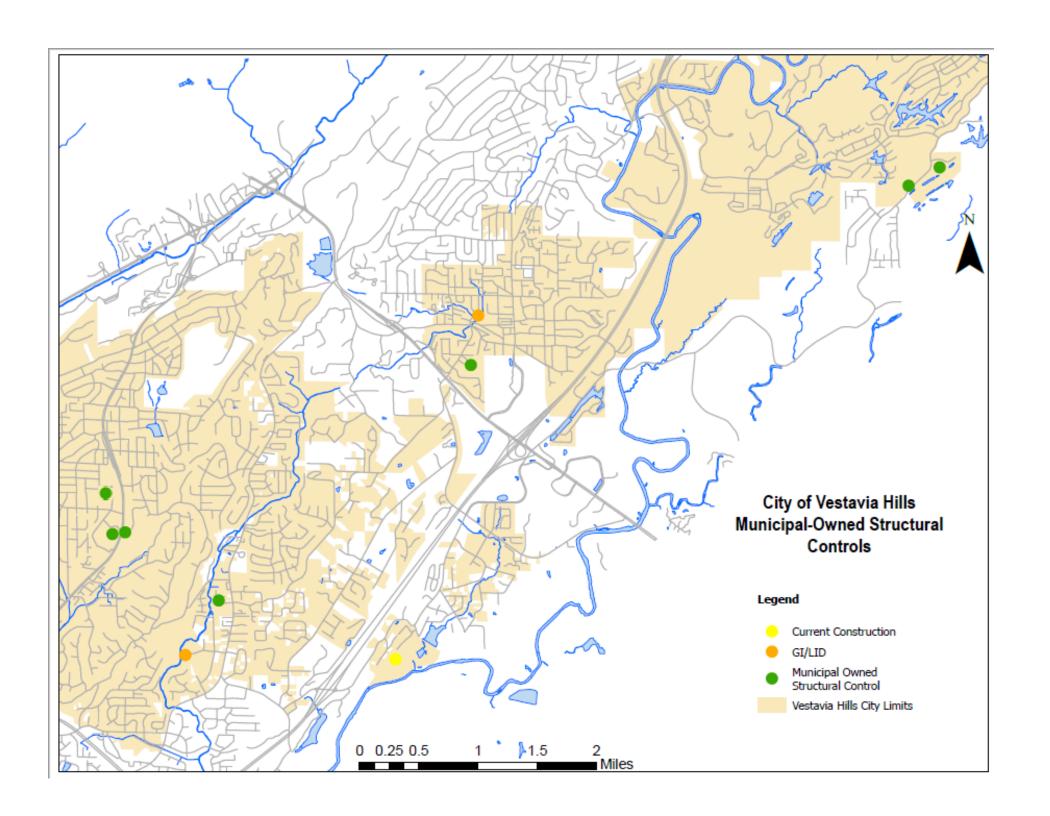

to become a member governing body in the Authority, indicating its intent to abide by these Bylaws, and authorizing its Mayor (if a city) or commissioner (if a county) to serve as a member of the Board of Directors of the Authority. The Board of Directors shall promptly act on such request, generally at its March meeting, in order that the applicant governing body may be admitted effective October 1 of the next fiscal year.

Section 18. Employees.

- a. The Authority shall use the Jefferson County Personnel Board to engage personnel to serve as the classified employees of the Authority (including the administrator or executive director of the Authority). Salaries and benefits shall be in accordance with the Jefferson County Personnel Board or the governing body from which the classified employee is assigned.
- b. The Authority may employ individuals directly or indirectly through loaned, detailed or assigned employees from the member governing bodies or other entities.

2024 SWMPP Public Input

The 2024 update to the City's SWMPP was discussed and public input was initiated via announcement by City Manager at the City Council meeting September 9, 2024. The draft document was uploaded to the City's website for viewing. Announcements and links were posted on the City's social media accounts and feedback was requested through the City's Vestavia Hills Listens portal. Public input was requested to be received no later than noon on September 20, 2024.

Public postings (screen shot above) were posted via social media on multiple occasions 9/10/24 through 9/20/24. The City received 6 comments from residents; please see attached screenshots formatted from our <u>Vestavia Hills Listens</u> responses.

2024 Stormwater Management Program Plan

2024 Stormwater Management Program Plan

This topic is closed

Introduction Feedback Your Statement

Public comment is requested in the development of the annual update to the Stormwater Management Program Plan (SWMPP). This plan outlines how the City will meet stormwater management goals and permit requirements and is available via the following link: 2024 SWMPP (Draft). The comment period will close at noon CST Friday, September 20, 2024. Thank you in advance for your input.

Name not shown inside Area West of Rocky Ridge

September 20, 2024, 8:03 AM

Most of the issues in my area (Little Shades Creek floodplain) is large development (schools, shopping and residential) that do not have adequate storm water retention measures in place. VHHS parking is a prime example where there is a large paved surface with little to no retention of storm water. The strips malls along Rocky Ridge Road are another. The basic problem is we are sending water into creeks too fast with large hard surface areas (like pavement) and straight ditching to the creeks. If we have an opportunity to remediate ditches, they should be replaced with baffled ditches which slows down the drainage or add retention ponds that hold storm water and release it more slowly. If this is done as far up to the source as is practical, the issue would be lessened greatly. Town Village is a good example of this although the berm there has been breached making it less effective. Another thing would be to recognize that LSC is basically a drainage ditch now due to the unchecked development and treat is as such by widening it to handle the flood levels. Each flood is eating away the banks on both sides with trees falling into the creek blocking the flow and creating further flooding issues. We are another 100 year flood away from serious issues along LSC.

Brandon Brown inside Cahaba Heights

We need help with storm drainage on Ida Lane in Cahaba Heights. I've lived here since 2004 and the storm drainage has gotten progressively worse. The creek across from my house overflows and funnels directly down my driveway -- and into my garage and then into my basement. My wife runs her business out of our basement and is scared to death her products will be ruined. After the rain on July 28, 2024 I had over 6 inches of water in my basement. Please help. (Brandon Brown 205-223-6770)

Ida Lane Riverkeeper inside Cahaba Heights

September 19, 2024, 12:59 PM

Dilapidated mostly vacant rental properties at 4017-4025 Crosshaven Rd. should be demolished and land converted to a retention pond/park similar to Meadowlawn

Name not shown inside Area West of Rocky Ridge

September 14, 2024, 1:39 PM

All Vestavia residents are aware of the issues along Highway 31 corridor, to the South end of the city. With the proposed development near the gateway to the city at the location, our city leaders should actively develop a plan that updates & protects these properties from future rain events from causing extensive damage like has happened in the past. On a different note, there are multiple utility easements throughout the city that are not adequately maintained by the appropriate managing authority (APCO, Spire, BWWB, AT&T, Spectrum, etc.). The lack of maintenance of these easements impacts Vestavia Hills residents & their properties both directly & indirectly with surface run-off and debris buildup throughout the city. City officials should require all utility providers to properly maintain & develop comprehensive plans to ensure our residents properties are not impacted by these large corporations both in terms of physical damage, nor financial value of the properties.

Name not shown inside Area West of Rocky Ridge

September 12, 2024, 3:44 PM

Vestavia has ignored stormwater issues for decades and our city is slowing crumbling into storm drains and pot holes. Driving down 31, you can see several examples of drainage and flooding issues that have not been addressed. In addition, private homeowners are asked to fix infrastructure that is the city's responsibility (specifically Mountain Woods Drive/neighborhood).

Name not shown inside Area West of Rocky Ridge

September 11, 2024, 10:32 PM

What is the plan for the major flooding that happens at the south end of highway 31 by Mark's sports and diplomat deli? The drainage from the north side of 31 and the drainage from the direction of Columbiana road intersect at this point. It has caused major flooding to many businesses and apartments for many years from that drainage intersection all the way to Royal automotive and further. The city knows that it's such a bad problem that any new business that wants to build in that stretch has to build their foundation up multiple feet for the city to allow it. The city will offer tax cut incentives to these businesses for doing so. Why not address the issue and try to fix the problem? The city constantly deflects any kind of blame and never a solution. This big flood plan only solves issues in small neighborhoods and not for the businesses that pay millions of dollars in taxes to the city. When does the city plan to address this issue?

Watershed Protection Program
Report Pollution Entering Streams
Stormwater Hotline Number:
930-1999

Jefferson County Department of Health Watershed Protection Program

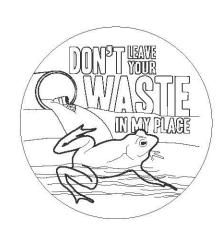

7 TIPS TO PROTECT WATERSHEDS AGAINST POLLUTION

- 1 Check your vehicle regularly for leaks. Recycle used motor oil at a participating oil change businesses.
- 2 Have your septic system inspected regularly. Clean out septic tanks every 3-5 years
- 3 Dispose of pet waste properly by picking up after your pets and flushing it down the toilet or placing it in the trash.
- Wash out paint brushes in the sink. Never clean brushes in areas that lead to a storm drain or a nearby stream.
- 5 Use car wash detergents sparingly. Wash your vehicle on grassy or gravel areas to allow the water to naturally absorb into the ground.
- 6 Follow the manufacturer's instructions when applying pesticides and fertilizers.

 Apply these products when there is no forecasted rain event that can cause runoff.
- 7 Do not place grass clipping and other yard waste in street gutters or storm drains. Compost or bag yard waste to prevent clogged storm drains that may lead to flooding.

Construction Checklist

The process of building a home or adding to your existing residence has a few key steps that must be remembered. The following checklist will give you an aid in this process:

- □ **Evaluate the Site:** Before any land disturbance has taken place on the site; mark any trees and the areas to be preserved; streams; wetlands; potential, erodible soils such as cherty soils (high rock %); and vegetation that could be useful for filter strips, especially on the perimeter areas. always call Alabama One Call at 1-800-292-8525 or 252-4444 in the Birmingham area.
- □ **Permitting:** Before any land disturbance has occurred on site, make sure that all necessary permits have been secured through the proper municipality; or if more information is needed on the permitting process, call (205)-930-1230.
- ☐ Install Perimeter Controls: Identify potential runoff areas where sediment could be channeled offsite. Install perimeter controls such as buffer strips, silt fences, storm drain inlet protection devices, or other BMP control measures to minimize sediment runoff.
- ☐ Build House and Install Utilities
- ☐ Maintain Erosion and Sedimentation

Controls: Inspect at least once per week or every 0.75 inch rain event, whichever is more frequent. Maintain until construction is complete. Clean off roadway and site of all debris and sediment.

- ☐ Revegetate Site: Immediately after house construction is complete, the lot should be stabilized with seed, sod, mulch, or mats. redistribute the stockpiled soil and spread to a depth of 4-6 inches over graded areas. Mulch newly seeded areas.
- ☐ Remove all Erosion Control Measures

Resources

- Erosion and Sedimentation Control Ordinance
- Alabama Handbook for Erosion Control, Sediment Control and Stormwater Management on Construction Sites and Urban Areas - includes detailed information for the following construction BMPs:

Stabilized Construction Entrance

Gradient Terraces & Surface Roughening

Topsoil & Mulch

Seeding & Sodding

Trees, Shrubs, & Vines

Erosion Control Matting & Geotextiles

Check Dams & Silt Fence

Straw Bale & Sandbag Barrier

Brush or Rock Filter Berm

Temporary Sediment Trap & Basin

Bank Stabilization & Soil Bioengineering

Diversions & Swales

Channel Linings, Gabions, & Riprap

Temporary Inlet & Outlet Protection

Level Spreader

Floating Sediment Curtain

Erosion and Sedimentation Control:

Individual Lot Construction

Stormwater Hotline 205 930-1999

Jefferson County Department of Health 1400 Sixth Avenue South • Birmingham, AL 35233 WWW. JCDH.ORG

Erosion Control is Important

This brochure contains an abbreviated version of Best Management Practices (BMPs) for individual lot construction. These practices should be used as aids to keep sediment on the construction site. Contact Jefferson County Department of Health at (205) 930-1230 for any further regulations.

The result of improper BMP installation on single family homes and construction sites contributes greatly to the amount of sediment released into Alabama's streams and waterways. Sediment is the number one pollutant of waterways in Alabama and the surrounding states.

Sediment can adversely affect our water quality by destroying the habitat that is critical to aquatic organisms and fish. It can also lower property value by destroying the chances for recreational water activities, promoting the growth of weeds and algae, and increasing the chances of flooding.

The cities of the Storm Water Management Authority (Adamsville, Brighton, Brookside, Center Point, Clay, Fairfield, Gardendale, Homewood, Hueytown, Irondale, Lipscomb, Maytown, Midfield, Mulga, Mountain Brook, Pinson, Pleasant Grove, Tarrant, Trussville, and Vestavia Hills) must regulate construction sites to ensure that sediment stays on-site for all construction sites. This regu-

lation is mandated by the Environmental Protection Agency (EPA) and is enforced in the Erosion and Sedimentation Control Ordinance.

Best Magagement Practices for Individual Lot Constructions

The use of properly installed BMPs can aid in keeping the sediment on-site. The following are a few useful BMPs for construction on individual lots.

Construction Exit Pad/ Entry

- · Prevents tracking soil and debris into roadways.
- · Requires 6" aggregate or more if needed.
- · Install during clearing and grubbing stage- should be maintained throughout construction.

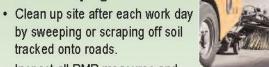

· Install geotextile under entrance.

Silt Fences

- · Used as most common BMP to trap sediment and intercept runoff.
- · Install filter fabric correctly by entrenching a portion of it in ground and always remember to place stakes downhill.
- · Maintain until permanent vegetation is established.
- · Never use on steep slopes or concentrated flow areas.
- . Know the difference between Type A, Type B, and Type C silt fences and where applicable.
- · Refer to Alabama Handbook, Volume 1, Page 282.

Sediment Cleanup and Good Housekeeping

by sweeping or scraping off soil tracked onto roads.

- · Inspect all BMP measures and repair as need after each storm event.
- . Don't allow sediment to build up on silt fence. Clean before the mid-point of the fence is reached.
- Refer to Alabama Handbook, Volume 2, Page 45.

Outlet Protection

- · Used on concentrated flows to dissipate energy.
- · Cuts down on bank erosion in streams.

· Refer to Alabama Handbook, Volume 2, Page 111.

Inlet Protection

- · All inlets must have some form of protection provided
- · Install before any sediment is moved on-site.
- · Must be inspected and maintained regularly.
- · Refer to Alabama Handbook, Volume 2, Page 127.

Stockpile Placement and Protection

- · Build stockpiles away from streams, drainage ways, wetlands, and storm water inlets.
- · Temporary seeding or mulching must be performed if sediment is to remain unmoved for 14 working days.
- · Refer to Alabama Handbook, Volume 1, Page 69.

Re-vegetation/ Run-off Protection

- · Stabilize all exposed surface from erosion.
- Seed, sod, or mat final graded surface.
- · Seed all swales, rights-ofway, curb inlet areas, and buffers along streams and wetlands.
- · Mulching can be used where acceptable.
- Refer to Alabama Handbook, Vol. 1, Pages 75-161.

Household Hazardous Waste (HHW) Smart Tips:

- Follow instructions on how to handle HHW products and disposal.
- Don't mix leftover HHW products, because they may act as a reacting agent, causing a chemical reaction resulting in an explosion or make HHW items become non-recyclable.
- Watch for hidden dangers: in your home HHW items may not present an immediate hazard, but improper waste disposal can make them a threat to human health and the environment.
- Recycle any HHW items: to save money and further reduce the need to generate more hazardous substances!
- Store all HHW products properly: keep HHW products out of reach of children and animals.

Call JCDH Stormwater Hotline number or visit the website to report HHW being dumped into the storm drains.

Household Hazardous Waste Disposal

What are Considered Household Hazardous Wastes?

The definition of a Household Hazardous Waste is a product that contains chemicals that are corrosive, explosive, reactive, flammable, or toxic. These products can be found in most cabinets throughout your home or storage areas. They include common products such as paint thinner, spot remover, oven cleaner, furniture polish, drain opener, pool chemicals, or hair spray.

The name of a product can indicate whether or not it falls in this category. Names such as pesticide, acid, fungicide, caustic, herbicide, flammable, explosive, or solvent are direct indicators. It is a good practice, to read all product labels carefully before throwing them away.

Improper disposal practices can involve Household Hazardous Waste being discharged into the septic tank, storm drain, on the ground, or placing items on vacant property.

Read Your Products' Labels

Corrosive- a chemical or its vapors that can burn or destroy living tissues at the site of contact, and deteriorate or wear away the surface of a material.

Explosive- violently bursts when exposed to pressure or heat or other substances.

Reactive- can cause explosions, toxic fumes, gases, or vapors when heated, compressed, or mixed with water.

Flammable- can be ignited by a flame, spark, ignition source or hot surface under almost all temperature conditions.

Toxic- can cause injury or death if swallowed, absorbed, or inhaled.

Household Hazardous Waste Affects The Environment

As a precautionary method residents can take steps to reduce the spread of Household Hazardous Waste (HHW) from entering into their home or landfill.

The direct results of HHW can be observed in your local waterways and streams, because most storm drains flow into the Cahaba River, Shades Creek, Village Creek, Valley Creek, Warrior River, and the Locust Fork water bodies with NO treatment.

Some common sources of contaminants in storm water runoff include: spilled oil, fuel, and fluids from vehicles and heavy equipment, construction debris, and landscaping runoff. Sources may also include pesticides or weed killers and materials such as motor oil, antifreeze, and paint products that people pour or spill into a street or storm drain.

Green Tips around the home!

- If you choose to apply fertilizer on your property, read the label carefully and always use precautions in using fertilizer products.
- Use only the amount recommended on the product label. Any amount left over should never be mixed with other fertilizer or pesticide products.
- Avoid applying fertilizer products outside on windy or rainy days. Never apply fertilizer near storm drains or creeks.
- Maintain existing trees on your property, and plant trees and shrubs that prevent erosion and support infiltration of water into the soil.
- Disperse organic deposits such as grass, wood chips, and leaves on soil to act as a compost system to prevent erosion and runoff.
- If you select a professional lawn care service, select a company that uses practices to minimize the use of fertilizers and pesticides.
- Misuse of fertilizers can damage the soil's natural resources essential for healthy grasses and plants. Contact Alabama Cooperative Extension System (ACES) Office or a garden supply center for a soil test kit.

Keep It Green and Simple

Fertilizer Versus Compost

Fertilizer contains large quantities of nutrients such as nitrogen and phosphorous that can potentially wash into storm drains and ultimately into a lake or stream. Nutrients from fertilizer may prompt algal blooms, causing aquatic plants to over grow and suffocate other aquatic life. As a result, algal blooms can remove the oxygen in the water that fish and other organisms need to breathe.

Compost can enhance soil structure and provide nutrients from a composition of decaying organic matter. Compost allows natural fertilizer to be applied to lawns and gardens assisting in the condition of the soil and increasing the nutrients. Compost has been discovered to suppress plant disease and pests, reduce or remove the need for chemical fertilizer, and increase agricultural crops' growth.

What are the Benefits to Compost?

Compost can prevent pollutants from entering into storm water runoff and reaching surface water resources. Another advantage of using compost is that it has been shown to prevent erosion and siltation near water banks, creeks, lakes, streams, roadways and golf courses.

Composting yard trimmings save landfill space and lowers methane production in landfills. The composting process can absorb odors and treat organic compounds. It binds heavy metals and prevents them from transferring to water resources being absorbed by plants and contaminated soils.

Compost has the ability to help restore poor soils. Composting strengthens the production of micro-organisms that break down organic matter to create humus. Humus is a rich nutrient-filled material that increases the nutrients in soils and helps maintain moisture.

Composting is Easy and It Makes Sense!

As an alternative to organic matter entering into storm drains, streams, creeks or landfills, compost can be converted into a beneficial resource which can even be reused around the household or environment.

Listed below are examples of how compost can be beneficial in your area:

- Farmers can use compost to enhance produce and grassy areas along their property.
- Landscapers can use compost as a soil modification for decorative purposes along properties, golf courses and playing fields.
- Landfill operators can use compost to cover waste areas onsite where waste material has been buried and during revitalization projects.
- Garden operators can use compost for improving plant and forest seedling crops in reforestation projects and for preventing certain plant diseases.
- Public operations can use compost for landscaping roadways, recreational parks, and other public property for remediating contaminated or weathered road sites.
- Homeowners use compost to enrich gardens and soils around trees and shrubs.

Pest Smart Tips

- If you choose to use pesticides, read the label carefully and always use precautions to apply pesticides.
- Never water your lawn after applying pesticides.
- Use only the amount recommended on the product label. Any amount left over should never be mixed with other pesticide products or chemicals.
- Always wear appropriate protective clothing.
 Never wash contaminated clothing with other clothing.
- Avoid planting your garden where treatments for pesticides are regularly applied.
- Avoid applying excessive amounts of pesticide products. Runoff from chemicals can spread onto concrete or paved surfaces and may enter storm drains or waterways with NO treatment.
- Avoid applying pesticide products outside on windy or rainy days. Never apply pesticides near storm drains or creeks.

Pesticides

Stormwater Hotline 205.930.1999

Integrated Pest Management

Pesticides should be applied only as needed. Integrated Pest Management (IPM) practices should be utilized before applying pesticide products. IPM practices can be applied in rural and urban areas such as in the home, yard, garden area and the workplace to prevent pests from becoming a threat.

Integrated Pest Management is used to incorporate the biological, physical, and least-toxic chemical pest prevention and control methods. IPM controls pests by the most cost-effective means and with the least possible hazards to people, property and the environment.

The least effective control approach is the application of chemicals alone. Using chemicals alone can result in very poor control to reduce or eliminate pests. Sanitation is the key! Remove access to food, water and shelter from pest.

Examples of Integrated Pest Management Practices Include:

- Vegetation, shrubs and wood mulch should be kept at least one foot away from structures.
- Cracks and crevices in walls, floors and pavement should be sealed or eliminated.
- Fertilizers should be sparingly applied seasonally during the year, rather than one heavy application.
- If pesticides are necessary, use spot treatments rather than area-wide applications.

Pest Control and Safety

Once you have identified the pests around your home or work area, purchase only the amount of pesticides that you are going to use. Any leftover pesticides should be used; for example, you can ask your neighbors if they have a similar pest control problem and allow them to use the pesticide.

Always keep pesticides in the original container, separate from fertilizer and herbicides products. Do not reuse the containers with remaining pesticide products. Place containers in the trash, unless the label specifies a different procedure.

Listed below are safety tips that you can follow if children visit your home or yard:

- Always store pesticide products away from children, such as; in locked cabinets or garden sheds.
- Avoid placing rodent or insect baits where small children can get to them.
- Teach children that "pesticides are poisons"something they should not touch.
- Caution others of the potential hazard of pesticides, including care givers and grandparents.

Storm Drains

Pesticides can negatively affect the quality of water. Whatever flows into the storm drain flows untreated into the waterway. A storm drain is designed to carry excess storm (rain) and ground water from streets and parking lots to prevent flooding. Rain water soaks into the ground; however, once there is pavement blocking water from gaining access to the soil, rain water goes through the storm drains.

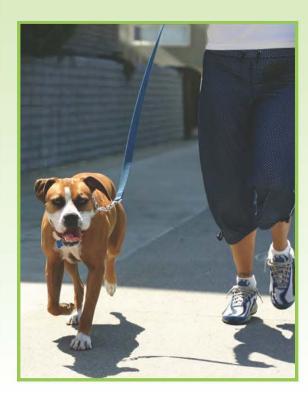

Never store pesticides in places where flooding is possible or in places where they might spill or leak into wells, drains, ground water, or surface water. Stormwater runoff can transport chemicals from fertilizers, herbicides, and pesticides into storm drains, streams or waterways. Surface runoff containing these chemicals may cause harmful effects in the water supply and damage a wide variety of organisms. Any debris or chemicals from household gardens, driveways, yards, and streets can be wash into the storm drains.

Pesticides can pollute the waterways. Always avoid pouring leftover pesticides down the sink, toilet, or storm drain. Pesticides may interfere with the operation of wastewater treatment systems or pollute the waterways. If pesticides reach the waterways, they may harm fish, plants, and other living things. Several organisms are harmless and even valuable to the ecosystem.

Small amounts of pesticides can be toxic to aquatic life. Aquatic plants and animals need oxygen and clean water to survive. Household wastes can enter the waterways through storm drains and negatively impact the water quality by decreasing oxygen reserves and contaminating the water.

Tips For Pet Owners

- Choose grassy areas, parks, or undeveloped areas to walk your pets. Stream banks should be avoided as the common territory of animals.
- Pick up after your pets. Pet waste left behind may be washed into storm drains, streams or waterways.
- Pet waste should not be added to backyard compost piles. Although animal manure can make useful fertilizer, parasites carried in dog and cat feces can lead to diseases.
- Regular check-ups and vaccinations by your local veterinarian are important to protect your pet against parasites and pathogens.

Scoop Away The Pet Waste

What Happens To My Pet Waste?

A hidden danger to public health can be found in your very own back yard. Pet waste left on sidewalks, streets, or other paved surfaces are carried by storm water into storm drains and streams.

Storm drains may not always connect to treatment facilities for water purification. Animal feces untreated can end up in local streams and rivers causing water pollution.

Decomposing pet waste consumes oxygen and can release ammonia.

Lower oxygen levels and ammonia can result in harmful health effects to fish and aquatic life. Bacteria, viruses, and parasites transmitted by pet waste may pose a danger to the health of humans and wildlife. Nutrients contained in pet waste also support weed and algae growth.

What Are The Health Effects of Pet Waste?

Another health concern associated with pet waste is pathogens. If ingested, humans can be adversely affected by pathogens found in pet feces.

E. coli is a common bacteria. Prominent strains can initiate serious illness and even fatalities. E. coli, which causes abdominal gas and diarrhea, has been the source of disease outbreaks in several states.

Cryptosporidium is highly resistant to disinfection with chlorine. This microorganism causes gastrointestinal illness lasting 2-10 days in healthy individuals, but can pose a fatal threat to people with weakened immune systems.

Cat feces may contain toxoplasmosis, a parasite that transmits a disease to humans and other animals. Cats are the only animals identified to release toxoplasmosis oocysts, which are resistant to most disinfectants. Toxoplasmosis is a health risk for pregnant women and individuals with weakened immune systems.

What Can I Do To Prevent Pet Waste?

Picking up your pet waste can result in a cleaner neighborhood and better water quality. Proper disposal of pet feces is important in reducing sources of water pollution.

Pet waste can be discarded by the following methods:

- Flushed down the toilet as long as it is not mixed with other material.
- Sealed in a plastic bag and put into the garbage.

These methods allow a community sewage plant or septic system to appropriately treat waste.

Rainwater Harvesting-water is collected to irrigate the landscape.

Rain Garden-water from a downspout collects, is treated and infiltrates into the ground on property.

Green roofs-rainwater is absorbed by vegetation and decreases the amount of water leaving

Bioretention-water flows into an area, is treated and infiltrates into the ground decreasing stormwater volume.

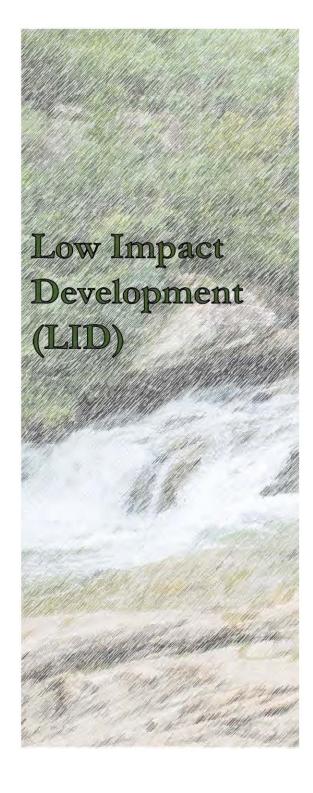

Concrete Grid Pavers-water infiltrates between the pavers decreasing the stormwater runoff compared to conventional paving.

Biofiltration Strip-water velocity is decreased as well as the amount of runoff.

What is Low Impact Development?

Low Impact Development (LID) practices work with nature to infiltrate, evaporate or reuse stormwater as close to the source(s) as possible.

Why is LID needed?

As land is developed, it is covered by structures, streets, driveways, and parking lots. These hard surfaces are commonly referred to as impervious surfaces. Rainwater cannot soak into impervious surfaces and the result is less water soaking into the ground (infiltration) and more water being transported into ditches and stormdrains that lead to the nearest waterway. This lack of infiltration and increase in flow rates into waterways can cause:

Lower Base Flow- The amount of water in a stream is sustained between rain events by groundwater seeping into the bed and banks of a stream. Without infiltration to replenish groundwater levels, stream levels are lower.

In-stream Erosion-Streams that have unnaturally large amounts of water flow due to impervious runoff, have their banks eroded or "deconstructed" at a much faster rate than what happens naturally. This can cause property damage.

Aquatic Habitat-The powerful flow of water and the sediment it carries quickly removes or fills in the "homes" and hiding places for all types of aquatic creatures. The preservation of this habitat means healthier ecosystems.

Water Quality Impairment-Stormwater runoff picks up pollutants from roads and other impervious surfaces. LID practices decrease runoff and help improve water quality.

Localized Flooding-As rainwater quickly travels to the nearest stream through the stormwater system, the amount of water can overwhelm the capacity of the infrastructure and the capacity of the receiving waterbody causing flooding.

Economic Benefits of LID

Many of the benefits of LID practices are both economic and environmental.

Reduced Building and Maintenance Costs-With less volume of water leaving sites, the need for the construction of curbs, gutters, and other conventional stormwater infrastructure is reduced thus decreasing cost. Construction costs can also be reduced by leaving more of the natural area untouched thus decreasing the cost of grading. Natural areas also have less construction and maintenance cost compared to landscaping a newly cleared area. Overall preserving natural areas has shown to increase the value of residential lots while decreasing the construction costs overall.

Added Value to Communities-The presence of more natural surroundings and improved aesthetics means increased marketing potential and desired properties. Access to open space and more possibilities for recreational opportunities all increase the desirability and value of property.

Reduced Property and Infrastructure Repair Costs-

By decreasing the volume and speed of water entering a local waterway, the number of flooding events will be reduced. This can cause less damage to structures and roads meaning less money spent on rebuilding or repairing property and infrastructure.

Improved Water Quality and Reduced Water

Treatment Costs-Since stormwater flows to the nearest waterbody untreated, it can transport oil, bacteria, sediment, metals, hydrocarbons, and nutrients. Using LID practices will reduce the amount of stormwater reaching local waterways thus improving the water quality. In areas that use surface waters such as lakes and rivers as sources for drinking water, good water quality means a reduction in water treatment costs.

Storm Water Hotline

(205) 930-1999

www.jcdh.org

Jefferson County Department of Health

Watershed Protection Program

Storm Water Hotline

930-1999

What is the Jefferson County Department of Health Watershed Protection Program?

The Storm Water Management Authority has contracted with JCDH to perform storm water monitoring, sampling, laboratory analysis, erosion inspection, and education. Storm Water Management Authority members are required by the 1972 Clean Water Act to protect watersheds within their city limits.

JCDH Watershed Protection Program Activities

- Conduct water sampling to monitor prohibited pollutant discharges from entering a storm drain or stream
- Analyze water samples to identify 'Hot Spots'
- Map high-risk areas in order to develop long term strategies
- Monitor residential and commercial construction sites for proper erosion control
- Educate the citizens of Jefferson County on watershed protection

What is a watershed?

A watershed is the area that drains to a common waterway such as: streams, lakes or oceans.

What can I do to protect my watershed?

 Recycle used motor oil at participating service stations or car maintenance shops

- Pick up after your pets. Leaving pet waste on the ground may cause harmful bacteria to wash into the storm drain
- Clean out septic tanks every 3-5 years
- Sparingly use fertilizers in landscaping projects
- Use caution when applying pesticides These chemicals will wash into your local stream

You can play a part in protecting our streams and rivers by eliminating and reporting pollution in surface waters.

Use Your Senses

- ... if a creek, stream, river, lake or other water body is discolored or an odor is present
- ... if untreated sewage or washing machine waste is present on the ground
- ... if mud from a construction site is entering into the storm drain or stream

Then call

...the Jefferson County Department of Health's Storm Water Hotline: (205) 930-1999

All messages will be investigated and referred to the proper agency.

Vestavia Hills

IMPORTANCE OF STORMWATER BASINS

Urbanized areas produce large stormwater runoff volumes due to large amounts of impervious surfaces.

Stormwater runoff can pick up pollutants such as sediment, nutrients, pesticides, and other waste, becoming a significant source of water pollution. A detention basin is designed to reduce the impacts of urbanization on local streams and rivers by collecting and slowly releasing stormwater, thereby improving stormwater quality as well as reducing peak flows.

Properly maintained detention basins can provide effective pollutant removal and necessary storage volumes during larger storm events. Improperly maintained detention basins can result in increased pollutants discharged downstream, risk of localized flooding, instability of downstream channels, and aesthetic and nuisance problems. It also is often very expensive to repair failed detention basins.

DETENTION BASINS

A dry pond that is a permanent stormwater management facility for the temporary storage of runoff and designed to hold water for a short period of time (2-6 days).

They are composed of inlets bringing water into the pond and outlets releasing water to streams or drainage ways.

RETENTION BASIN S

A wet pond that is designed as a stormwater facility that provides permanent storage of runoff which is only released through percolation, evaporation and emergency overflow. They allow pollutants to settle before discharging into another water body.

Conduct periodic scheduled inspections of your basin and inspections after major rain events.

Inspect basin, inlets and outlets:

- Structural integrity make sure they are not damaged or crumbling
- Erosion check around pipes for erosion or missing rip rap
- Obstructions check pipes for flow obstructions from debris, trash or sediment.

Speak Up

Address issues identified during inspections by communicating with property owners association (POA)

Follow Up

Conduct inspections at a minimum annually and notify POA if issues arise

Basin Maintenance

- •Check for litter and debris near inlets, in the basin, and at outfalls
- Remove and properly dispose of all litter and debris
- •Inspect entire basin for bare soils and eroded areas
- Stabilize bare areas with seed and mulch
- Remove sediment that has accumulated to more than 6-12".

Vegetation Management

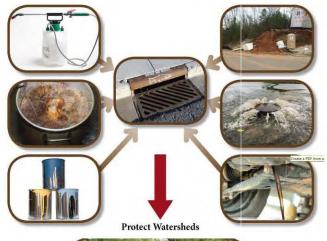

- Mow regularly (4-6" grass height) to eliminate need for brush removal.
- •Limit use of fertilizers & pesticides in and around basins.
- Remove noxious weeds and saplings.
- Remove vegetation around inlet/outlet structures to allow drainage.
- Remove trees and saplings that reduce capacity of the basin for water storage.
- •Inspect vegetative growth in the spring & fall. Cattails should be cut & removed in late fall to minimize clogging from dead vegetation.

alabama RAIN BARREL PROJECT

when it rains... it stores.

Rain barrels are a fun and easy way to use water wisely. Water collected in a rain barrel can be used to water the lawn, garden or indoor plants or to wash the car or dog. Using collected rain water reduces the water bill, helps protect streams and replenishes groundwater.

saving our water, one drop at a time.

Healthy landscape practices promote environmental conservation and keep nature's water cycle flowing for our plants and animals.

A Partnership of:

1 Rainwater -

should be used by people, plants and trees and should replenish groundwater with only a small portion making its way to our streams. If it runs off quickly, it is called stormwater runoff.

Rain Barrel – an easy to make container that saves rainwater for use during a dry period. This saves you money on your water bill and helps protect our water resources.

your driveway is an impervious surface along with the street and roof. This means that rainwater cannot make its way into the ground where it would water plants and replenish groundwater. Instead it runs off quickly to streams

4 Rain Garden – an easy to plant garden that uses native plants to help clean stormwater runoff and allows it to replenish groundwater.

S Groundwater – water that is found underground and supplies well water for our cities, farmers and families. It also provides the yearround flow for many streams and creeks.

6 Surface Water -

and rivers and provides water for our cities, industries and recreation. When rain occurs, water rushes from impervious surfaces picking up pollutants that are on the ground, carrying them straight to the creek or stream.

Color each litter item being carried into the waterway by the storm drain. Help protect **Clog the Green Frog** by recycling. Remember, recycling is the key!

Clean water is essential for you and me!

DEPARTMENT OF HEALTH

DON'T LEAVE YOUR WAS TEN HEAVE LEAVE TO THE LEAVE LEAV

A storm drain is designed to carry excess storm (rain) and ground water from parking lots and streets to prevent flooding. Litter and waste contaminants that storm water carries from road ways can contribute to water pollution that may harm animals, drinking water and the environment.

Children play a part in protecting our streams by educating their friends on recycling and keeping litter such as soda cans, plastic bottles, plastic bags and paper out of the waterway.

Clog the Green Frog has waste at his place. Help protect Clog from litter items being carried into the waterway by the storm drain. Find each litter item listed below in the word search.

GAME RULES:

Residential

Factory/Business

Objective: Participants will identify point and non-point source items on a game board that can contribute to pollution. Participants will learn about actions that are environmentally friendly.

One individual from each team will roll the box on the game board. The teams will take a turn rolling the box before they take subsequent turns.

STEP 2 Whatever color the box lands on, the participant will then answer a question from the same colored card.

If your team answers the question correctly, your team will receive points. If your team answers the question incorrectly the team next to you will have an opportunity to answer the question. If no teams answers the questions correctly the game moderator will give the correct response to the question. The amount of points awarded to a team can vary based on the completeness of the answer.

DEFINITIONS:

An area of land where all of the water runoff from a rain or snow flows into the same **Watershed**

body of water.

Fertilizer (PHF)

Pesticides/ Herbicides/ Pesticides and herbicides are chemicals that are harmful to bugs and plants respectively. Fertilizers help plants grow. PHFs can cause water quality issues if the product

is not applied correctly.

Sediment Material that is formed by the breaking down of rocks and soil by natural and unnatural processes involving wind and water. When the material is transported by water it flows

downstream. This material can cause waterbodies to change width, change course,

and change habitat.

Point Source A single source of pollution that can be identified from an outlet such as a pipe,

ditch or smokestack.

Pollution (examples include litter, pet waste, metal and automobile fluid) that can end up **Non-point Source**

in the stormwater infrastructure and ultimately in local water-bodies.

Best Management Practices Practices that help stop stormwater runoff (examples include silt fences, filter socks,

hay bales, and detention ponds).

Infiltration The process of water being able to enter and/or pass through a material (soil can be

infiltrated by water; concrete cannot).

POLLUTION PATROL

Essentially what we throw out or pour on the ground can potentially end up in our watersheds. Litter and waste contaminants can contribute to water pollution that may harm animals, water quality and the environment.

Clog the Green Frog has waste at his stream residence from different sources. Identify how the following actions can affect his home and his living conditions.

Watersheds

A watershed is an area of land where all of the water drains into a specific waterway. Watershed protection can be achieved by stopping contaminants from reaching the stormdrain system which flows directly into our waterways. Watershed protection is essential in protecting our community's drinking water supply, local aquatic plant and animal life, and our favorite fishing and canoeing spots.

Everyone lives in a watershed. Listed below are tips that YOU can do to protect your local watershed.

- Dispose of household waste properly. Never dump chemicals into a stormdrain or stream.
- Cover your garbage cans with secure lids to stop your waste from becoming litter.
- Use caution when applying fertilizer or pesticide products. These chemicals can cause harm if washed into a local stream.

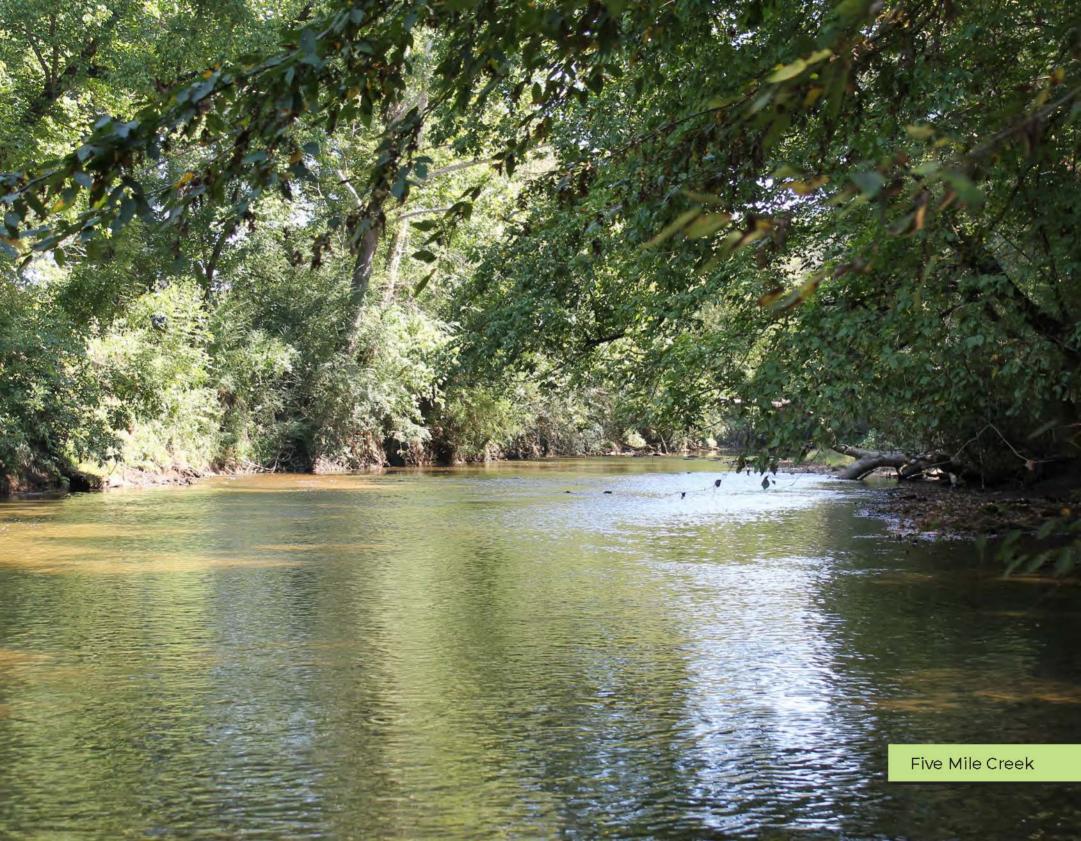

Native Animal: Alabama Hog Sucker

For additional information on watersheds visit: https://www.epa.gov/waterdata/surf-your-watershed

Scoop the Poop

Scooping away your pet's waste can result in cleaner neighborhoods and a reduction in diseases associated with pet contamination.

Tips for Pet Owners

- Pick up after your pets. Pet waste left behind may be washed into stormdrains, streams or waterways.
- Pet waste should not be added to backyard compost piles. Although animal manure can make useful fertilizer, parasites carried in pet feces can lead to diseases.
- Regular check-ups and vaccinations by your local veterinarian are important to protect your pet against parasites and pathogens.

Native Animal: Blue Heron

/.

For additional information on proper disposal of pet waste visit: http://adem.alabama.gov/moreinfo/pubs/cwp_pet.pdf

Household Hazardous Waste

Household hazardous waste (HHW) products can be found in most cabinets throughout your home and storage areas. Household hazardous waste is a product that contains chemicals that are corrosive, explosive, reactive, flammable, or toxic.

Household Hazardous Waste Safety Tips

- Follow instructions on how to handle HHW products and disposal.
- Don't mix leftover HHW products. Active ingredients within these products may react causing an explosive chemical reaction or result in HHW items becoming non-recyclable.
- Watch for hidden dangers:
 HHW items may not present
 an immediate hazard, but
 improper disposal can make
 them a threat to human
 health and the environment.

Native Animal: Longear sunfish

Fertilizers

Fertilizers contain large quantities of nutrients such as nitrogen and phosphorous. Nutrients from fertilizers may prompt algal blooms which can lead to low oxygen levels in the water thus endangering aquatic life.

Green Tips

- Compost can enhance soil structure and provide nutrients from decaying organic matter.
- Spreading organic deposits such as grass, wood chips, and leaves on soil can improve the soil as well as prevent erosion and runoff.
- Misuse of fertilizers can damage the soil's natural resources. Contact the Alabama Cooperative Extension System (ACES) Office or a garden supply center for a soil test kit.

Native Animal: Redeye Bass

For additional information on fertilizers visit: http://www.adem.alabama.gov/programs/water/nps/take/fertilizing.pdf

Car Wash

Consider going to a commercial wash; commercial car washes are required to properly dispose of wastewater, and many recycle their water. If you select not to use a commercial car wash, try to wash your vehicle on a grassy area or a gravel surface.

Cleaning Tips

- Use biodegradable soaps or phosphate free soap to wash your vehicle, using as little water as possible.
- Shut off the water while washing your car, then rinse.
- When rinsing your vehicle use a spray nozzle to restrict water flow.

Native Animal: Alabama Darter

For additional information on washing your vehicle visit: http://www.adem.alabama.gov/programs/water/ nps/take/vehicletips.cnt

Pesticides

There are many pests that are harmless and beneficial to our environment. Integrated Pest Management Practices (IPM) should be utilized before applying pesticide products. IPM practices work to identify, monitor and track pests to accurately incorporate the best methods to prevent them from becoming a threat. If pesticides are necessary, use spot treatments rather than area-wide applications.

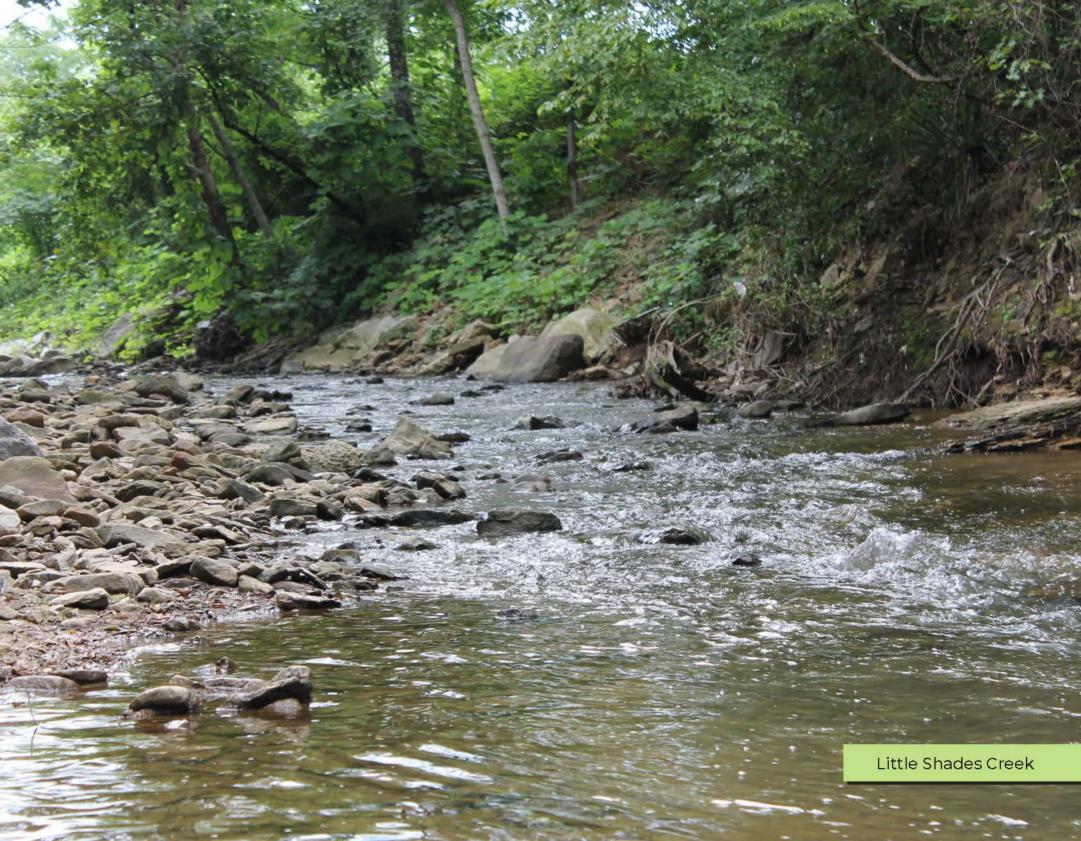

Pesticide Tips

- If you choose to use a pesticide, read the label carefully and always use precautions when applying pesticides.
- Avoid applying pesticides to your lawn on windy or rainy days.
- Avoid applying pesticide products near stormdrains and gardens.

Native Animal: Common Snapping Turtle For additional information on pesticides visit: https://www.epa.gov/pesticides

Illicit Discharge

An illicit discharge is any discharge into the Municipal Separate Storm Sewer System (MS4) that is not stormwater. Non-stormwater discharges can occur due to illegal connections to the MS4 from homes, commercial businesses or industries. Illicit connections may be intentional or unknown to the home or business owner.

Contact your local municipality to report an illicit discharge into the MS4.

Illicit Discharge Tips

- Frequent sources of Illicit discharges are illegal floor drain connections or runoff from failing septic systems.
- Discolored water or a distinct odor can be signs of an illicit discharge.

Native Animal: Yellow Bullhead Catfish

Household Cooking Grease

Jefferson County
Environmental Services
Household Cooking Oil and
Grease Recycling Program
provides a FREE recycling
program to promote the health
and maintenance of our sewer
system. Improper disposal of
oil and grease from kitchens
can result in sewer blockages.
Sewer blockages can lead to
sewer overflows which can run
into the nearest waterway
causing water quality issues.

Below are tips to reduce sanitary sewer overflows caused by grease.

- Do not pour fats, oils and grease down sink drains.
- Scrape grease and food particles remaining on pots, pans and dishes into the garbage.
- After using your cooking grease, allow it to cool and pour it into an empty container with a lid and recycle it.

Native Animal: Bluegill Sunfish

For a listing of household cooking grease recycling stations visit: http://www.jeffcoes.org/Default.asp?ID=112&pg= HOUSEHOLD+COOKING+OIL+RECYCLING

Littering

Littering is the careless and casual disposal of trash or waste along roadways and waterways. It may include items as large as automobile tires or as small as cigarette butts. Litter can also result from improper trash disposal by motorists or uncovered truck loads whether intentional or not.

Recycling and Disposal Tips

- Keep trash items in your vehicle until you reach a destination that you can properly dispose of trash items.
- Reduce, reuse and recycle materials whenever possible.

Native Animal: Gulf Fruitilary Butterfly For additional information on litter and recycling visit: https://kab.org

Septic Tanks

Septic systems are used throughout many areas of Jefferson County where sewer is not available. When properly maintained, a septic system can be expected to have a long and trouble-free service life. A septic system consists of a septic tank and an absorption field or disposal area.

Septic System Maintenance Tips

- Avoid pouring harsh products down the drain.
- Have your septic tank pumped every 3-5 years by a qualified professional.
- Repair leaks and use water efficient fixtures to prevent a septic system malfunction.

Native Animal: Blacktail Redhorse Sucker

OCTOBER 2024

Carpet

Carpet and upholstery cleaning wastewater often contains harmful chemicals, cleaning products and dirt that can impact your health as well as the environment. Consider having your carpet professionally cleaned. When having your carpet cleaned, never dispose of the liquid cleaner into or near a stormdrain. Wastewater should be contained inside a holding tank and hauled off-site for proper disposal.

Carpet Cleaning Tips

- Select nontoxic products that are environmental friendly cleaning agents.
- Place carpet in your home only where necessary and clean it properly to increase its life expectancy.
- Consider recycling your old carpet to prevent it from going into a landfill.

Native Animal: Creek Chub Minnow

For additional information on carpet maintenance visit: https://www.epa.gov/greenerproducts/identifying-greener-carpet

Automobile Fluids

Motor oil and fluids from your vehicle can contain toxic chemicals and heavy metals that are slow to degrade.
Check with a local automobile maintenance facility to find out if they accept used automotive fluids.

Automobile Fluids Safety Tips

- Conduct routine maintenance on your vehicle and check for leaks. Leaks from your automobile can be carried by stormwater runoff into the nearest waterway.
- When pouring liquids into your vehicle use a funnel and place a tray beneath your vehicle to catch spills. In the event of a spill, clean it up immediately.
- Use a leak-proof container with a lid to temporarily store fluids removed from your vehicle until proper disposal.

Native Animal: Stoneroller Minnow

2024 JEFFERSON COUNTY WATER FESTIVAL—FINAL REPORT

The 19th Annual Jefferson County Water Festival was held on Friday, March 8, 2024 at Samford University's Propst Hall. A total of 306 fourth grade students, teachers and parents representing five schools in four school districts attended. The schools participating in the event were Oxmoor Valley from Birmingham City Schools, Liberty Park Elementary from Vestavia Hills Schools, Snow Rogers Elementary and Brookville Elementary from Jefferson County Schools, and Red Mountain Academy, a private school.

Partnering organizations and private individuals were crucial to the success of this event. They provided volunteers, finances, products, services, or a combination of those things. These partners were:

- Alabama Department of Environmental Management
- Alabama Cooperative Extension System & 4-H
- Alabama Forestry Commissions (State, Jefferson, Shelby)
- AMERICAN Cast Iron Pipe Co.
- Birmingham Water Works
- City of Birmingham Storm Water
- County Conservation Districts (Jefferson, St. Clair, Tuscaloosa, Cullman, & Walker)
- Earth Team Volunteer program
- Jack's in Homewood (donated breakfast biscuits to volunteers)
- Jefferson County Department of Health, Watershed Protection Division
- Jefferson County Farmers Federation
- Jefferson County Master Gardeners
- Jefferson County Soil & Water Conservation Foundation
- Jefferson County Stormwater Program
- Jones Sportswear (discount on shirts)
- Keep Birmingham Beautiful
- Ice Cream Warehouse (donated ice cream used in Edible Aquifer activity)
- Oak Grove High School (provided volunteers)
- Arby's of Birmingham (gave reduced-pricing on volunteer lunches)
- Samford University, Propst Hall (facility use)
- USDA/Farm Service Agency
- USDA/Natural Resources Conservation Service

In all, 71 volunteers provided 305 hours of volunteer service worth \$9,699 to the festival.

FINANCIAL REPORT

RAIN BARREL WORKSHOP

A workshop with Regional Extension Agent Bronson Lubresky & Hana Berres from the Jefferson County Commission

April 20 | 9:15 am - 12 pm | 701 25th ST N, Birmingham, AL

Learn about how to capture, store, and repurpose rainwater at your home and take home a ready-to-install 55-gallon rain barrel! Register for just the class for \$5, or register for the class and a ready-to-install barrel for \$38. Limit 2 barrels per household while supplies last. Barrels are approximately 42" tall and 22" in diameter. If cost of the workshop is prohibitive please contact Jessica at community@jvtf.org

Visit <u>bit.ly/2024RainBarrelWorkshop</u> to register.

Contact Holly at *jefferson@alconservationdistricts.org* if you have registration questions.

Made possible in partnership from Jefferson County Commission, Jefferson County Department of Health, Keep Birmingham Beautiful, SWMA Inc., & the cities of Birmingham, Bessemer, and Leeds.

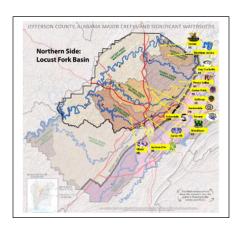

Funding provided by CAWACO RC&D Council

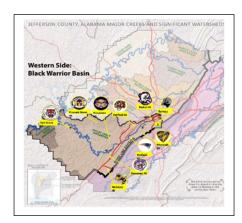

The AL Cooperative Extension System and Jones Valley Teaching Farm are equal-opportunity educators & employers. In 2024, Jones Valley teaching Farm's Good Community Food Initiative is hosting a public workshop series in partnership with the AL Cooperative Extension.

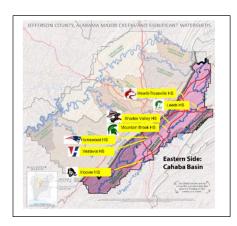

The Litter Quitters Campaign

Litter Quitters is an anti-litter campaign with three main parts, aiming to engage high school students through financial incentives, a county-wide video competition, and mass media support. To keep the schools and students engaged and focused on their local watersheds, they were divided into three major watershed basins: North - Locust Fork, West - Valley Creek, and East - Cahaba River. Each school competed for cash prizes against only the other schools in their watershed basin, thus fostering a sense of local community and connection. A mass media campaign was launched to increase exposure to the Litter Quitters campaign and its anti-littering message across various demographics. Public service announcements (PSAs) aired on television and radio stations and displayed on the back of public buses.

Watershed / Basin Competition Areas

The Litter Quitters Committee

Litter Quitters is a project that the Jefferson County Conservation District spearheads in partnership with a working committee made up of the following organizations (listed in alphabetical order): the City of Birmingham, the City of Bessemer, the City of Leeds, Creative Directions, Inc., Freshwater Land Trust, the Jefferson County Commission, the Jefferson County Department of Health.

The Video Competition

The Litter Quitters program encourages high school students to act against littering and spread awareness about its harmful effects. By creating short videos, students can educate others about the impact of litter on the environment, and the public can vote for their favorite videos. Cash prizes are awarded to the winning videos, including a special prize for the video with the best environmental message and production quality.

To participate, each school had to submit a 60-second video to the watershed competition. Once the videos were reviewed and approved by the Litter Quitters Committee, they were posted on the Litter Quitters website for public viewing and voting for 12 days. This voting process not only determines the winners but also makes the public an integral part of the campaign, giving them a sense of influence and involvement. Students were responsible for promoting their respective videos, and the videos with the most 'likes' in each significant watershed area received cash prizes at the end of the competition. Additionally, an overall "Best Message" category awarded an extra cash prize to the video with the best environmental message and technical quality, as judged by an independent group separate from the Committee.

The PSA Campaign:

News interviews on local television and radio stations provided an opportunity to announce the start of the competition, encourage people to vote, and recognize the winners when the competition ended.

The PSAs were created to discourage littering by reaching people through radio and bus ads as they drive. Participating schools were invited to send one student representative to participate in a professionally produced public service announcement (PSA) that aired on local television. The televised message allows the Litter Quitters Committee to promote its anti-litter message to a broader audience (the public) by using Jefferson County high school students to deliver it.

The 2024 Project Summary

The 2024 *Litter Quitters* competition was open for 12 days, starting April 10 and ending at 11:59 p.m. on Earth Day, April 22. Videos were due Friday, April 5, 2024.

- A total of 218 students within 9 schools viewed presentations that included information about Jefferson County's local waterways and watersheds, litter and its negative impacts on the environment, competition details, and how their school can participate. Of the total, 184 students attended live presentations, and 34 watched recorded presentations on the website (https://www.litterquitters.org/classroom-resources).
- 30 schools were invited to participate in the video competition; seven submitted videos. Reports show 11,622 likes and 16,231 video views were recorded during the 12-day competition.
- 30 schools were invited to participate in the television PSA, and 8 sent representatives (Carver, Clay-Chalkville, Hewitt-Trussville, Homewood, Hoover, Huffman, Minor, and Oak Grove).
- One student from 2022 participated in the radio PSA, available in English (Shades Valley).
- The media campaign, which ran from April 15, 2024, through July 28, 2024, received 3,184,980 deliverable impressions.
 - o five television and one radio interviews were given to announce and promote the competition and reveal the winning schools.
 - o 330 PSAs aired between April 15, 2024, through July 28, 2024 (129 radio and 201 television).
 - Five bus ads displayed in 2023 were not removed and are still displayed in 2024.
 - One print ad and a half-page article were featured in late July 2024.
- The Jefferson County Commissioners provided Certificates of Recognition to all winners on July 11, 2024, during a Commission meeting.

The 2024 Sponsors

The Litter Quitters Committee, American Cast Iron Pipe

Company, Drummond Company, Inc., and Freshwater Land Trust sponsored the 2024 Litter Quitters campaign. Gray Media, Summit Media, Sinclair Media, and Birmingham Times added value to the paid advertising.

The Budget

The total budget for 2024 was **\$22,500.00**, which paid for the cash prizes, the annual website fees, and the media campaign. Media campaign funds were spent with WBRC-TV (FOX6), WBMA-TV (ABC33/40), WABM-TV (MY68), WTTO (CW21), BOUNCE -TV, WBHJ-FM (JAMZ), 107.3-FM (Birmingham Mountain Radio), and Birmingham Times.

The Video Competition Results:

Total likes as of April 22, 2024, at 11:59 pm = 11,622 Total views as of April 22, 2024, at 11:59 pm = 16,231

Northern Area Winners (Locust Fork Watershed / Basin)

1st - Minor 486 likes; 1,010 views

2nd – Clay Chalkville 306 likes; 953 views

Eastern Area Winners (Cahaba River Watershed / Basin)

1st- Homewood 245 likes; 799 views

Western Area Winner (Valley Creek Watershed / Basin)

1st – Oak Grove 341 likes; 985 views

2nd – Fairfield 202 likes; 516 views

Overall "Best Message" Video Winner Minor High School

The Media Outreach - Live Interviews

The project was featured on multiple media platforms. The televised interviews were recorded, and stations provided links that were used on social media.

On April 4, 2024, four television interviews were held on Good Day Alabama, which aired from 7:00 am to 10:00 am. The interviews highlighted the 2024 project and encouraged the public to watch and vote for their favorite video on LitterQuitters.org once the competition began. Teachers from schools that submitted videos to the contest were invited to participate. Mr. Campbell from Clay Chalkville spoke about his experience with the project and the various teachable moments this program has had on his students. Also featured during the four live segments was the Litter Gitter, a structural control device that traps floating litter in the creeks. Various agencies emphasized the importance of properly disposing of your trash to avoid it ending up in our creeks.

• On Tuesday, April 17, 2024, a radio interview was conducted on Birmingham Mountain Radio (BMR), 107.3 FM, to showcase the 2024 project. BMR caters to an environmentally conscious audience and is more likely to be interested in this project and its objectives. https://www.litterguitters.org/the-campaign

On Tuesday, April 26, 2024, a television interview occurred on ABC 33/40's Talk of Alabama, which airs from 9 am to 10 am. During the interviews, all winners were announced. Minor High School, the overall best message video winner, attended the event in person. They discussed their experience with the project and shared how they came up with the storyline for their video. The segment ended with discussing how people can get involved in their local communities to host volunteer litter cleanups with committee members.

The Public Service Message Campaign

Articles and Ads:

The Birmingham Times featured an article and ad promoting the video competition and congratulating the winners in its June 27-July 3, 2024, edition. The reports indicate that 40,000 deliverable impressions were reached during the July run dates.

Transit Bus Ads

The Committee created an anti-littering message displayed on five
Birmingham Jefferson County Transit Authority MAX Transit fixed-route
from May 16, 2023, through July 10, 2023. The five ads remained displayed until
the space was resold. Several buses are still showing the ads in 2024. The
message promoted the proper way to dispose of trash – putting trash in a trash
can at home, in a public space, and when driving your vehicle. By doing this
simple action, a person can prevent litter and "Be a Litter Quitter!"

Jefferson County Commission executed a contract with ClasTran to place "Don't' make me pull this bus over" anti-litter messages on the back of five ClasTran buses. The paid messages will be displayed for one year from the installation date.

LITTERING IS STUF

Student Featured Radio Public Service Message / Paid Commercial

In 2022, Roderick Morning-Trice, a Shades Valley/JCIB student, professionally recorded a 30-second English radio PSA. The same PSA was used again this year, acknowledging Drummond Company, Inc. as a sponsor. The advertisement encouraged drivers to dispose of their trash correctly and not litter. A total of 129 radio PSAs aired from June 3, 2024, to July 19, 2024.

The Radio PSA Script:

Litter is more than just ugly. It's full of germs. It can cause car wrecks. Litter gets washed by rain into our streams and rivers. It harms fish and animals... and it can make you sick. Litter costs a lot to clean up, so what can you do? Join (insert sponsor's name) by becoming a Litter Quitter. Go to Litter Quitters dot org and learn how you can get involved. That's Litter Quitters dot org. And if you do litter.... please stop! Littering is ... well, just stupid!

Student Featured Television Public Service Message / Paid Commercial

All participating schools were invited to participate in a television public service message that would be broadcast on local stations. The anti-litter commercial, featuring students from participating schools, was professionally produced as an in-kind donation from WBRC and aired on FOX6, ABC33/40, MY68,

CW21, and BOUNCE-TV. The video shoot occurred at Railroad Park on March 21, 2024, and April 4, 2024. Litter Quitters backpacks containing information from various committee members and sponsors were given to the students who attended the recording and provided to all the students who helped create the video.

The Television PSA Script:

Litter is dirty, ugly, and full of germs. It can cause car wrecks and gets washed by rain into our rivers and creeks, hurting fish, water, and animals. It costs a lot to clean up and affects all of us. Be a litter quitter because littering is stupid!

This year, six high schools participated in the student-featured television public service message/paid commercial, which can be viewed on the Litter Quitters website (https://youtu.be/SgkG5ggBv4k). A total of 201 televised PSAs ran from June 3, 2024, through July 22, 2024, reaching 2,715,630 deliverable impressions.

The 2024 Litter Quitter Movie Stars

Top Row: Kayla Parrish (Oak Grove), Tracyeta Murphy (Minor HS),

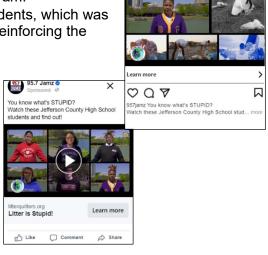

Coy Bankhead-Casey (Clay Chalkville HS).

Bottom Row: Caleb Wright (Mortimer Jordan HS),

Brant Simmons (Hoover HS), Khyriana Mallory (Fairfield HS)

In addition to the PSAs that aired on television:

- JAMZ 95.7 and the Jefferson County Commission promoted the PSA video on social media platforms, including Facebook and Instagram.
- Jefferson County Commission created a Reel with the students, which was shared within Jefferson County's social media platforms, reinforcing the Litter Quitters PSA message.

Salamander Festival

January 27, 2024 @ 1:30 pm - 4:30 pm

HW EVENT SalamanderFest2018 6 Salamander Festival

The Friends of Shades Creek Salamander Festival is set to take place on Jan. 27 from 1:30 to 4:30 p.m. at the Homewood High School Gymnasium, located at 1901 S. Lakeshore Drive.

Attendees can engage in various activities, such as observing real salamanders, participating in a nature hike at the Homewood Forest Preserve, attending a presentation on salamanders, and enjoying free arts and crafts for children.

The event is free of charge, and more information can be found on the official website at shadescreek.org.

Cleanup Events 2024

The City of Vestavia Hills would like to thank the efforts of the Cahaba Riverkeeper and those involved in the following events:

Meadowlawn Park Cleanup, 4/27/24

10 Participants completed a small cleanup, focusing downstream of Meadowlawn Park. Litter was removed from the stream and along the banks, as well as a large amount of woody debris that had clogged the creek and created a dam. City of Vestavia Hills Parks Department removed the litter that was collected.

McCallum Park Cleanup, 7/27/24

15 Participants, including a group of girls scouts, worked to remove litter from Little Shades Creek at McCallum Park. City of Vestavia Hills Parks Department removed the trash from the park. Additionally, Riverkeeper staff have routinely picked up trash while at the park over the summer for the Swim Guide program, as well as educated visitors to the park encountered about Swim Guide and the results published weekly from May thru September.

Additionally, the City of Vestavia Hills would like to recognize the ongoing efforts to monitor water quality concerns at these locations.

Riverkeeper staff collect samples at both parks for the Swim Guide program from May thru September. As part of that program, 16 samples are collected at each site. Staff frequently monitor above both parks to identify sources of contamination, and when possible, attempt to address any concerns found. The efforts are part of a three year grant to identify the origins of any bacteria detected to help isolate and determine if the product of human or animal contamination. This data is being used to identify specific sources, and potential resolutions.

The City hosted Stormwater BMP Training at Vestavia Hills City Hall on Wednesday, June 12, 2024.

This event was attended by 15 employees from the City's Public Works Department, and 6 employees from the City's Engineering and Public Services Department. See attached attendance sheet.

The training was led by Skip Ragsdale of Sunshine Supplies and Christopher Brady, City Engineer. Skip provided an overview of stormwater bmps used for construction site sediment and erosion control. This included sample of flocculants and demonstration of separating suspended material from a jar of cloudy turbid water. Skip's presentation included photos from various construction sites related to construction site entrance pads, properly installed and effective stormwater inlet protection, silt fence, wattles, and other bmp and sediment barrier materials. Skip provided additional detail on the effectiveness of Polymer Enhanced Sediment Retention Barriers (SRBs) and other products available to use in City's construction projects including concrete cloth, turf reinforcement matting, as well as others. The in-office presentation was followed by a site visit to a local construction project. Attendees walked the site and reviewed the in-place construction bmps and discussed maintenance and alternative considerations for the critical slope areas.

The training session consisted of about 2.5 hours for both in office and the site visit. The training reinforced importance of Good Housekeeping measures for City-led construction activities, and provided continuing education opportunity for the City's QCI/QCP personnel.

Electronic Collection Event Report Birmingham Zoo – January 27, 2024

The Jefferson County Commission, in partnership with the City of Bessemer, City of Birmingham, City of Leeds, City of Mountain Brook, Jefferson County Department of Health Watershed Protection Program, Jefferson County Cooperative Extension System, Jefferson County Soil and Water Conservation Foundation, Keep Birmingham Beautiful, Nucor Steele, Inc., Protec Recycling, Storm Water Management Authority, Inc. and Village Creek Society, held an Electronic Collection Event on Saturday, January 27, 2024 at the Birmingham Zoo

from 9:00 am until 11:30 am. Staff from partnering organizations assisted on the day of the event to manage traffic and unload the vehicles, and members of the Phi lota Omega Chapter of the Alpha Kappa Alpha Sorority, Inc. assisted with the intake process of collecting data from those that participated. Funds for this event were provided by Nucor Steele, Inc., and the City of Mountain Brook.

- Intake forms were collected from 537 vehicles representing 606 households located within 31 local jurisdictions from 51 unique zip codes.
- An estimated 102 people assisted with intake, unloading the vehicles, traffic flow and materials distribution.
- A total of 12.92 tons of electronics were collected and 6.05 tons of paper were shredded on site.

2024 Stormwater Calendars were distributed along with information about the *MyJeffCoApp*, schedule of 2024 HHW and Electronic event dates, and the hazards of mercury.

The event was promoted by the partners and shared on the Jefferson County Commission's social media platforms as well as being posted on the *KeepItCleanJeffCo* web pages. Jefferson County's Public Information Office (PIO) purchased three print ads, one full page placed in Birmingham Times, ½ page ad in Trussville Tribune and ½ page in Gardendale Magazine. Jefferson County's PIO highlighted the event on a monthly Talk of Alabama segment and purchased radio ad spots with Summit Media on the following stations: WZZK, WPYA, WBHK, WBPT, and WPYA.

Electronic Collection Event Report Center Point – May 11, 2024

The Jefferson County Commission, in partnership with the City of Bessemer, City of Birmingham, City of Leeds, City of Mountain Brook, Jefferson County Department of Health Watershed Protection Program, Jefferson County Cooperative Extension System, Jefferson County Soil and Water Conservation Foundation, Keep Birmingham Beautiful, Nucor Steele, Inc., Protec Recycling, Storm Water Management Authority, Inc. and Village Creek Society, held an Electronic Collection Event on Saturday, May 11, 2024 at the Jefferson County

Center Point Satellite Courthouse from 9:00 am until 11:30 am. Employees from Jefferson County's Roads and Transportation and General Services Departments, the City of Birmingham and the Jefferson County Department of Health assisted on the day of the event to manage traffic and unload the vehicles. Members of the Phi Iota Omega Chapter of the Alpha Kappa Alpha Sorority, Inc., along with other volunteers, assisted with the intake process of collecting data from those that participated. Funds for this event were provided by the Jefferson County Commission.

- Intake forms were collected from 191 vehicles representing 214 households located within 25 local jurisdictions from 40 unique zip codes.
- An estimated 59 people assisted with intake, unloading the vehicles, traffic flow and materials distribution.
- A total of 4.25 tons of electronics were collected and 2.63 tons of paper were shredded on site.

Reusable trash bags that contained year 2024 Stormwater Calendars, information about Jefferson County's newly launched *MyJeffCoApp* and their used household oil and grease recycling program, a brochure about the hazards of mercury, and the 2024 household hazardous waste and electronic drop-off schedule.

The event partners publicized this event within their networks, through flyers distributed to the public, and on various social media platforms. In addition, Jefferson County's Public Information Office paid for printed ads and radio spots to promote all 2024 drop-off events as part of a larger *KeepItCleanJeffCo* media campaign.

WBRC's Fox 6 News interviewed staff during the event which aired later that night on the 9:00 P.M and 10:00 P.M. news as well as on all three Good Day shows the following morning on Sunday, May 14, 2024.

Electronic Collection Event Report Valley Creek Water Reclamation Facility – June 8, 2024

The Jefferson County Commission, in partnership with the Cities of Bessemer, Birmingham, Leeds, Mountain Brook, the Jefferson County Department of Health Watershed Protection Program, Jefferson County Cooperative Extension System, Jefferson County Soil and Water Conservation Foundation, Keep Birmingham Beautiful, Nucor Steele, Inc., Secure Shredding and Recycling, Storm Water Management Authority, Inc. and Village Creek Society, held an Electronic Collection and Paper Shredding Event on Saturday, June 8, 2024 at the

Jefferson County Valley Water Reclamation Facility from 9:00 am until 11:30 am. Employees from Jefferson County's Roads and Transportation, General Services and Environmental Services Departments, the City of Birmingham and the Jefferson County Department of Health assisted on the day of the event to manage traffic, unload vehicles, and collect data from those brought electronic equipment for recycling. Funds for this event were provided by the Jefferson County Commission.

- Intake forms were collected from 124 vehicles representing 138 households located within 22 local jurisdictions from 35 unique zip codes.
- An estimated 34 people assisted with intake, unloading vehicles, traffic flow management and materials distribution.
- A total of 4.43 tons of electronics were collected and 3.38 tons of paper were shredded on site.

The City hosted Stormwater BMP Training at Vestavia Hills City Hall on Wednesday, June 12, 2024.

This event was attended by 15 employees from the City's Public Works Department, and 6 employees from the City's Engineering and Public Services Department. See attached attendance sheet.

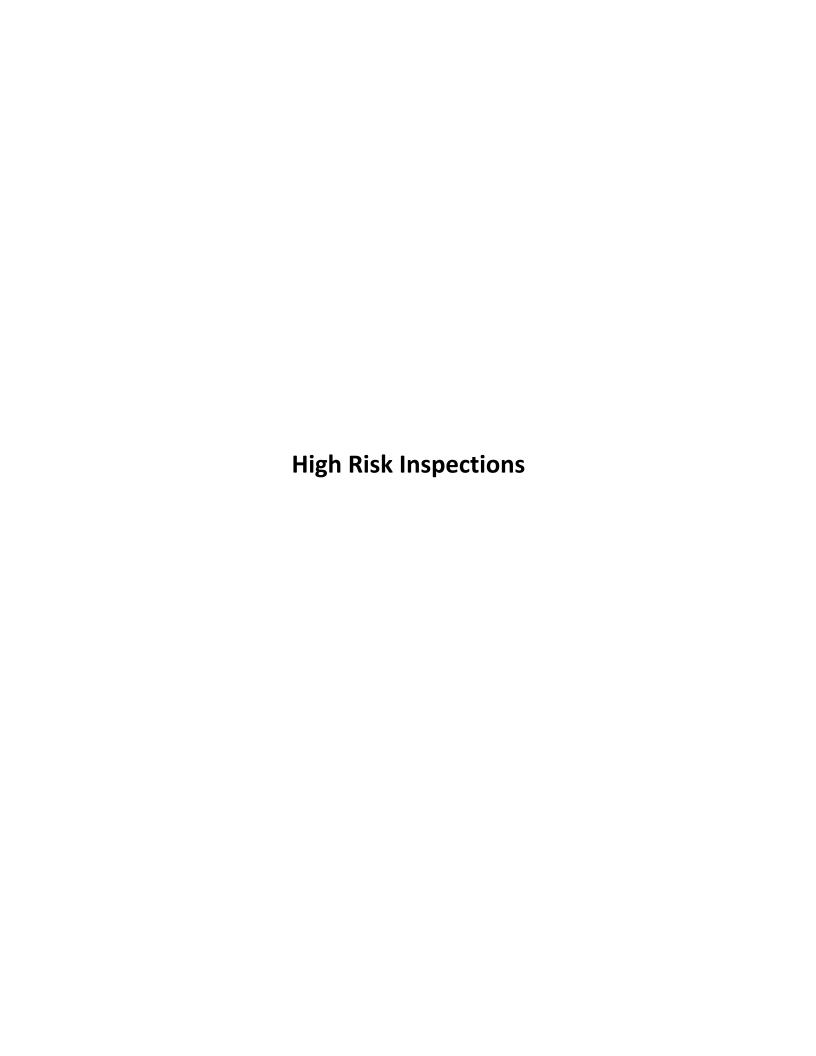

The training was led by Skip Ragsdale of Sunshine Supplies and Christopher Brady, City Engineer. Skip provided an overview of stormwater bmps used for construction site sediment and erosion control. This included sample of flocculants and demonstration of separating suspended material from a jar of cloudy turbid water. Skip's presentation included photos from various construction sites related to construction site entrance pads, properly installed and effective stormwater inlet protection, silt fence, wattles, and other bmp and sediment barrier materials. Skip provided additional detail on the effectiveness of Polymer Enhanced Sediment Retention Barriers (SRBs) and other products available to use in City's construction projects including concrete cloth, turf reinforcement matting, as well as others. The in-office presentation was followed by a site visit to a local construction project. Attendees walked the site and reviewed the in-place construction bmps and discussed maintenance and alternative considerations for the critical slope areas.

The training session consisted of about 2.5 hours for both in office and the site visit. The training reinforced importance of Good Housekeeping measures for City-led construction activities, and provided continuing education opportunity for the City's QCI/QCP personnel.

Status	Inspected
SWMA Member	Vestavia Hills
Inspector	Erick Gilkey
Date	2024-07-23
Time	13:11
Facility Name	U-Haul
Facility Street Address	1024 Montgomery Hwy Vestavia Hills, AL 35216
Facility Type	Mechanic
Was the site inspected	Yes
Categories	Motor Fluids, Car Wash
Facility Phone Number	2058236946
Facility Contact Name	Chris Hardin
Facility Contact Title	Shop Manager
SPCC	The business doesn't have a written SOP program. The employees are trained on cleanup measures. The employees are trained Video instructions, Written instructions. Employees are trained upon hire.
Spill SOP	Pig Mat is used for small spills. For large spills the fire department is contacted, the police department is contacted
Motor Fluids	
Fluid Types	Engine Oil, Transmission Oil, Antifreeze, Degreaser, Gear Oil, Gear lube
New Engine Oil	1-250gal, metal, inside
New Transmission Oil	1-250gal, metal, inside
New Gear Oil	2-16gal, metal, inside
New Antifreeze	4-55gal, metal, inside
New Brake Fluid	10gal total of pint and gallon, plastic, inside
New Wiper Fluid	1-55gal, plastic, inside 2-55gal, plastic, outside, uncovered, no berm present, stored on pallet
New Degreaser	2-55gal, plastic, inside
New Grease	2 cases of 10 tubes inside
Used Fluids Storage	Used antifreeze, transmission fluid, brake fluid 1-250gal, inside, metal
	Used oil 1-250gal, plastic, outside, covered, no berm present
Car Wash	
Car Wash Description	Hand wash, water drains into an oil separator and is stored in an underground tank until pumped out
Soap Storage	2-55gal, plastic, inside 2-5gal, plastic, inside
Waste	Waste containers are provided and used. Dumpster(s) are used. Clean (vey little uncleaned spills and/or un-cleaned surfaces).

Notes

Waste oil 2-250gal, inside, used for heater

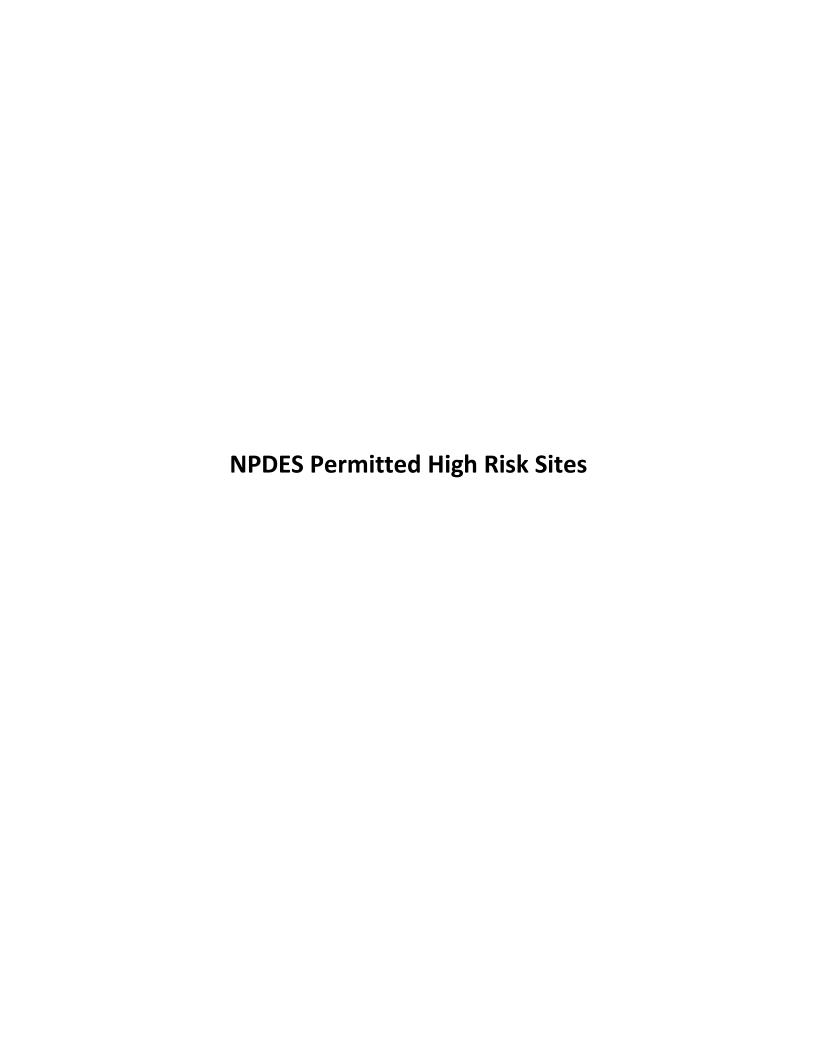

Hydraulic fluid 2-5gal, metal, inside

Appendix J

Monitoring Data

Year	# Species	IBI
2010		
2011	11	26
2012	11	30
2013	11	30
2014	9	28
2015	12	28
2016	9	28
2017	12	24
2018		
2019	9	26
2020		
2021	8	26

Species

r = -0.558 p = 0.119

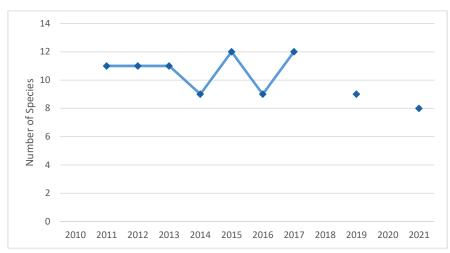

IBI

r = -0.534p = 0.139

Conclusion:

No significant time trend for either #species or IBI.

Shades Creek @ Irondale Furnace

Year	# Species	IBI
2010		
2011	8	28
2012	10	30
2013	13	34
2014	12	38
2015	12	38
2016	12	38
2017	10	32
2018		
2019	10	34
2020		
2021	8	28

Species

r = -0.246 p = 0.524

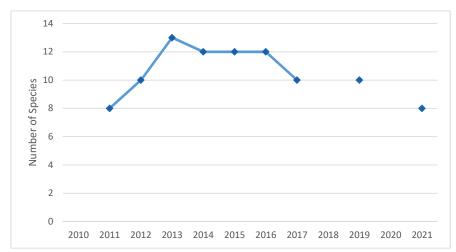

IBI

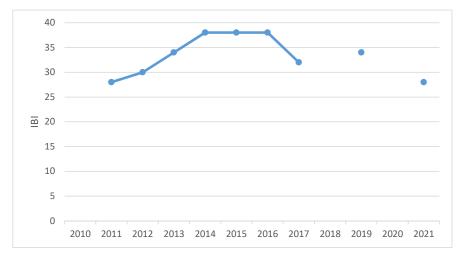

r = -0.018p = 0.962

Conclusion:

No significant time trend for either #species or IBI.

Shades Cr @ Barton Labs

Year	# Species	IBI
2010		
2011	11	38
2012	11	32
2013	11	36
2014	13	36
2015	9	32
2016	9	34
2017	12	34
2018		
2019	11	34
2020		
2021	8	28

Species

r = -0.448p = 0.227

IBI

r = -0.697p = 0.047

Conclusion:

No significant time trend for #species.

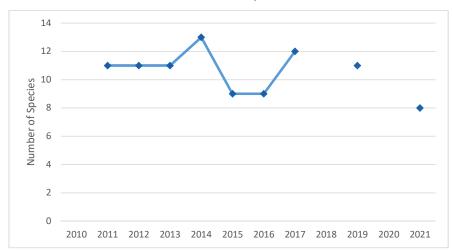

Significant negative time trend for IBI. Driven by the 2011 & 2021 data points.

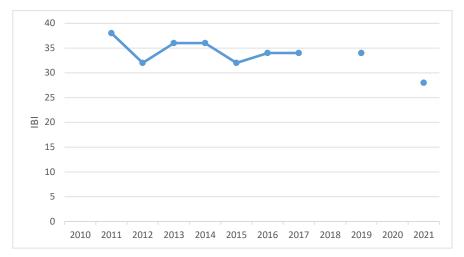

If you remove them, there is no trend at all. (r = 0)

This is also shown by using the nonparametric Spearman correlation coefficient (based on ranks).

 r_s = -0.508, p = 0.162

Patton Cr @ Royal Motors

Year	# Species	IBI
2010		
2011	12	36
2012	8	32

Year	# Species	IBI
2010	6	26
2011		
2012	6	26
2013	5	26
2014	6	30
2015	7	24
2016	7	26
2017	7	24
2018		
2019	7	24
2020		
2021	8	24

Species

r = 0.816p = 0.007

IBI

r = -0.504p = 0.166

Conclusion:

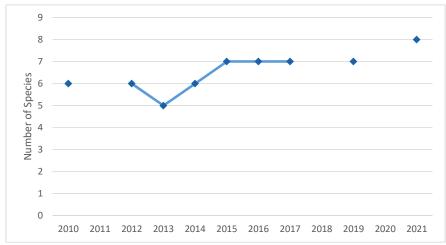

There is a significant positive trend in # species.

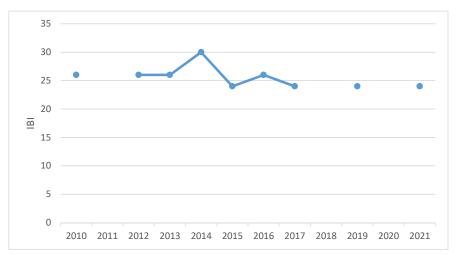

This is also the case if the nonparametric (based on ranks) Spearman correlation coefficient is used.

 $r_s = 0.875$, p = 0.003

The trend in IBI is slightly negative and not significant.

Year	# Species	IBI
2010	10	36
2011		
2012	11	38
2013	15	40
2014	8	34
2015	11	38
2016	13	38
2017	8	34
2018		
2019	13	42
2020		
2021	8	34

Species

r = -0.193 p = 0.619

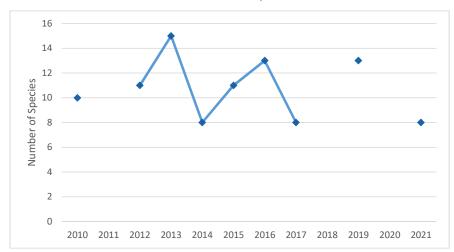

IBI

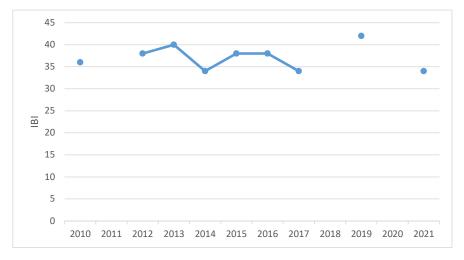

r = -0.054 p = 0.891

Conclusion:

No significant time trend for either #species or IBI.

ACCOUNTANTS' COMPILATION REPORT

To the Board of Directors of the Storm Water Management Authority, Inc.

Management is responsible for the accompanying financial statements of the Storm Water Management Authority, Inc., which comprise the statement of assets, liabilities, and fund balance – cash basis as of September 30, 2024, and the related statement of revenues, expenses, and fund balance – cash basis for the one month and twelve months then ended, and for determining that the cash basis of accounting is an acceptable financial reporting framework. We have performed a compilation engagement in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the AICPA. We did not audit or review the financial statements, nor were we required to perform any procedures to verify the accuracy or completeness of the information provided by management. Accordingly, we do not express an opinion, a conclusion, nor provide any form of assurance on these financial statements.

The financial statements are prepared in accordance with the cash basis of accounting, which is a basis of accounting other than accounting principles generally accepted in the United States of America.

Management has elected to omit substantially all the disclosures ordinarily included in financial statements prepared in accordance with the cash basis of accounting. If the omitted disclosures were included in the financial statements, they might influence the user's conclusions about the Organization's assets, liabilities, fund balance, revenues, and expenses. Accordingly, the financial statements are not designed for those who are not informed about such matters.

We are not independent with respect to Storm Water Management Authority, Inc.
