PLUMBING PERMIT APPLICATION

Page 2 of 2

The purpose of this list is to make you aware of some of the new construction requirements contained in the International Residential Building Code (IRC) as amended and adopted by the City of Vestavia Hills. Please be aware that this list is not all-inclusive and does not diminish the importance of those changes not covered.

- 1 N1103.3:** Circulating hot water systems: All circulating hot water piping shall be insulated to at least R-2. Circulating hot water systems shall include an automatic or readily accessible manual switch to control pump power.
- 2 P2603.2.1:** Protection of piping against physical damage. In concealed locations, where piping, other than cast-iron or galvanized steel, is installed through holes or notches in studs, joists, rafters or similar members less than 1.5 inches from the nearest edge of the member, the pipe shall be protected by shield plates. Protective shield plates shall be a minimum of 0.062-inch thick steel, shall cover the area of the pipe where the member is notched or bored and shall extend a minimum of 2 inches above sole plates and below top plates. This shielding requirement also applies to mechanical system piping such as refrigerant lines. See Section M1308.2.
- 3 P2720.1:** For whirlpool bathtubs, Access to pump must be 12x12 minimum size. Where pumps are located more than 2 feet from opening it shall be 18x18. By City amendment to the Code: A faceless GFI outlet must be provided in a readily accessible location in the bathroom for whirlpool tub motor protection.
- 4 P2803.1 (as amended):** Water heaters installed in attics must be provided with an automatic water supply shutoff valve with water sensor.
- 5 P2803.6.1 (as amended):** Additional requirements for TPR valve discharge pipes: The discharge piping serving a pressure-relief valve, temperature-relief valve or combination temperature-pressure-relief valve shall discharge to the outdoors, except where a floor drain installed in the slab and discharges outdoors and cannot have more than four 90 fittings and not extend more than 30 feet.
- 6 P2603.6:** Freezing, where water pipe is located outside of the building it must be protected by insulation or heat or both.
- 7** Water heaters in garages must be on a stand and safety pole installed to protect water heater.
