PLACING COLLECTION ITEMS PROPERLY

When placing garbage, trash (yard debris and bulky items), and recycling for pick-up, please place them correctly to the curb. Poor placement of items may delay or impede collection, result in costly property damage, or present hazards to the community.

If items are placed improperly, you may be required to move them before they can be collected by City services. Please also keep in mind that vehicles parked near where items are placed will also prevent collection of items.

PROPER PLACEMENT CHECKLIST

- Not on or in the right-of-way (which includes sidewalks)
- Not on a storm drain cover
- Not further than 4 ft from the curb
- Not under a low utility line
- Separated piles for yard debris vs. bulk/junk materials

Please also keep in mind that vehicles parked near where items are placed will also prevent collection of items.
