2014 City of Vestavia Hills Executive Summary Report

Overview and Methodology

ETC Institute administered the DirectionFinder® survey for the City of Vestavia Hills during April of 2014. The survey was administered as part of the City's effort to assess citizen satisfaction with the quality of city services. This is the second time that the City of Vestavia Hills has administered a citizen survey with ETC Institute. The first survey was administered in 2011.

Resident Survey. A seven-page survey was mailed to a random sample of 1,500 households in the City of Vestavia Hills. Approximately seven days after the surveys were mailed residents who received the survey were contacted by phone. Those who indicated that they had <u>not</u> yet returned the survey were given the option of completing it by phone. Of the households that received a survey, a total of 420 completed the survey. The results for the random sample of 420 households have a 95% level of confidence with a precision of at least +/- 4.8%. There were no statistically significant differences in the results of the survey based on the method of administration (phone vs. mail). In order to better understand how well services are being delivered by the City, ETC Institute geocoded the home address of respondents to the survey (see map below).

The percentage of "don't know" responses has been excluded from many of the graphs shown in this report to facilitate valid comparisons of the results from Vestavia Hills with the results from other communities in the *DirectionFinder*® database. Since the number of "don't know" responses often reflects the utilization and awareness of city services, the percentage of "don't know" responses has been provided in the tabular data section of this report. When the "don't know" responses have been excluded, the text of this report will indicate that the responses have been excluded with the phrase "who had an opinion."

This report contains:

- a summary of the methodology for administering the survey and major findings
- charts showing the overall results for most questions on the survey
- benchmarking data that show how the results for Vestavia Hills compare to other communities
- importance-satisfaction analysis
- tables that show the results for each question on the survey
- a copy of the survey instrument
- GIS maps that show the results of selected questions as maps of the City

Overall Perceptions of the City

Most (93%) of the residents surveyed, *who had an opinion*, were satisfied with the overall quality of life in Vestavia Hills; only 1% were dissatisfied and the remaining 6% gave a neutral rating. Most were also satisfied (86%) with the overall quality of services provided by the City. There were **no significant increases** in respondents' perceptions of the City, and there were **no decreases**.

Overall Satisfaction with City Services

The overall City services that residents, who had an opinion, were most satisfied with (rating of 4 or 5 on a 5-point scale) were; the quality of public safety services (95%), the quality of the City's school system (93%), and the quality of public library facilities/services (91%). Those surveyed were least satisfied with the maintenance of City streets and facilities (57%). Among the City services that were assessed, there was **one significant increase**: effectiveness of City communication with the public (+10%). In this report, a "significant increase/decrease" is defined as **a change of 5% or more** since 2011. There were **no significant decreases** in satisfaction with City services.

Overall Priorities

The overall areas that residents thought should receive the most emphasis from the City of Vestavia Hills over the next two years were: 1) maintenance of City streets and facilities, 2) the quality of the City's school system, and 3) flow of traffic and congestion management.

Satisfaction with Specific City Services

- **Public Safety.** The public safety services that residents, *who had an opinion*, were most satisfied with (rating of 4 or 5 on a 5-point scale) were: the response time of fire and emergency personnel (92%), the quality of local fire protection (91%), and the quality of local police protection (91%). There were **eight areas of public safety with significant increases** from 2011. They include: response time of fire and emergency personnel (+7%), quality of local ambulance service (+7%), the City's efforts to prevent crime (+11%), visibility of police in neighborhoods (+11%), enforcement of local traffic laws (+6%), visibility of police in retail areas (+9%), fire safety education programs (+5%), and quality of animal control (+6%). There were **no decreases** in satisfaction with public safety.
- <u>Feelings of Safety in the City</u>. Most (99%) of the residents surveyed, *who had an opinion*, felt safe, in general (rating of 4 or 5 on a 5-point scale) in Vestavia Hills. In addition, ninety-eight percent (99%) of residents felt safe in their neighborhood during the day and 99% felt safe in commercial and retail areas. There were **no significant increases** in feelings of safety from 2011, and there were **no decreases**.
- <u>Codes and Ordinances.</u> More than three-fourths (76%) of the residents surveyed, *who had an opinion*, were satisfied (rating of 4 or 5 on a 5-point scale) with the enforcement of codes designed to protect public safety, and 68% were satisfied with the enforcement of sign regulations. Those surveyed were least satisfied with the enforcement of maintenance of residential property (59%). There were **two significant increases** in satisfaction from 2011: enforcing sign regulations (+7%) and enforcing the maintenance of residential property (+6%). There were **no decreases**.
- <u>City Maintenance</u>. The maintenance services that residents, *who had an opinion*, were most satisfied with (rating of 4 or 5 on a 5-point scale) were: the maintenance of traffic signals (89%), the maintenance of City buildings (87%), and the maintenance of street signs (84%). Residents were least satisfied with the adequacy of City street lighting (68%). There were **three significant increases** in satisfaction from 2011: maintenance of City buildings (+7%), maintenance of street signs (+5%), and adequacy of street lighting (+8%). There were **no significant decreases**.

- <u>Parks and Recreation</u>. The parks and recreation services that residents, *who had an opinion*, were most satisfied with (rating of 4 or 5 on a 5-point scale) were: the maintenance of City parks (83%), the City's youth athletic programs (75%), and outdoor athletic fields (70%). Residents were least satisfied with the number of walking and biking trails in Vestavia Hills (45%). There were **three significant decreases** in satisfaction from 2011: ease of registering for programs (-7%), swimming pools (-8%), and City recreational programs (-5%). There were **no significant increases**.
- <u>City Communication</u>. Eighty-one percent (81%) of the residents surveyed, *who had an opinion*, were satisfied (rating of 4 or 5 on a 5-point scale) with the quality of the community newsletter and 67% were satisfied with the availability of information about City programs and services. Residents were least satisfied with the level of public involvement in local decision-making (49%). There were **four significant increases** in satisfaction from 2011: quality of the community newsletter (+11%), availability of information on other City services and programs (+11%), and transparency of City government (+8%). There was **one significant decrease**: level of public involvement in local decision-making (-7%).
- <u>Customer Service from City Employees</u>. Of the 35% of residents who contacted the City with a question, problem or complaint during the past year, 81% of those surveyed, *who had an opinion*, indicated the customer service contact was either "always" or "usually" courteous and polite. Residents were least satisfied with the overall resolution to their issue (61% indicating either "always" or "usually"). There were **two significant decreases** in satisfaction with customer services from 2011: ease of contact (-5%), and prompt, accurate and complete answers provided (-5%). There were **no significant increases**.
- <u>City Leadership.</u> More than three-fourths (79%) of residents surveyed, *who had an opinion*, were satisfied (rating of 4 or 5 on a 5-point scale) with the quality of leadership by the City's elected officials. The same category showed a **significant increase** from 2011 (+9%). There were **no decreases**.
- <u>Trash Services</u>. Ninety-one percent (91%) of residents surveyed, *who had an opinion*, were satisfied (rating of 4 or 5 on a 5-point scale) with residential trash collection services in Vestavia Hills. They were least satisfied with brush and bulky removal services (61%). There were **two significant increases** in satisfaction with trash services from 2011: recycling programs (+6%) and litter control along major streets (+7%). There were **no decreases**.

Other Findings

35% of those surveyed indicated they had called "911". Of those, most felt they were treated professionally (98%), while 97% said their call was answered in a timely manner and 95% indicated their call resulted in a satisfactory response.

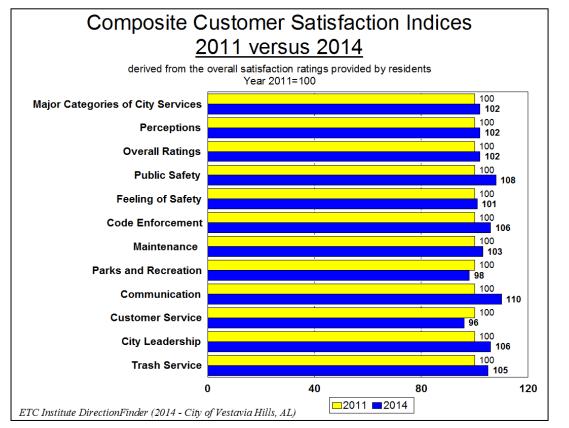

- Capital improvements that respondents indicated were the most important were: sidewalk extensions (44%), roadway improvements that lead to development (41%) and redeveloping current parks (38%).
- Capital projects that respondents felt were the most important to fund through general obligation bonds were: sidewalk extensions (30%) and roadway improvements that lead to development (29%).

Analysis of Trends in Satisfaction

To objectively assess the change in satisfaction with city services from 2011 to 2014, ETC Institute developed Composite Customer Satisfaction Indices for the City. The Composite Customer Satisfaction Indices by department/area are derived from the mean rating for each specific department/area. The index for each department is then calculated by dividing the mean rating from the current year by the mean rating from 2011 and then multiplying the result by 100.

The chart below shows how the composite performance for the major categories of City services as well as specific departments/areas changed from 2011 to 2014. Since 2011 is the base year, values greater than 100 indicate that the composite performance for the department/area improved from 2011. Values less than 100 indicated that the composite performance has decreased from 2011. Ten of the twelve areas showed increases from 2011, including overall satisfaction with the major categories of City services rated.

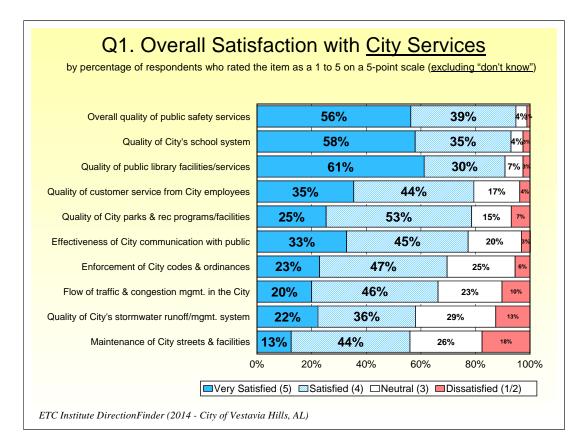

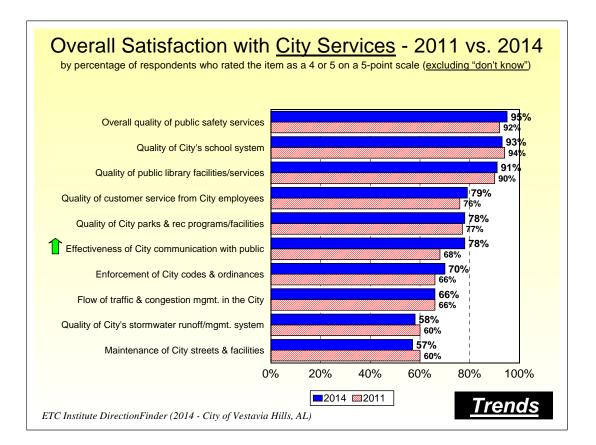

Opportunities for Improvement

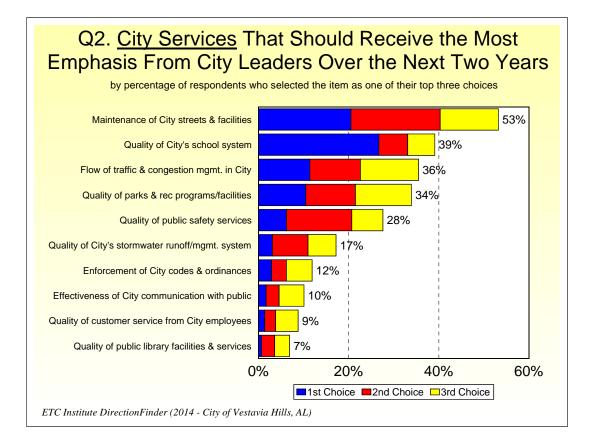

In order to help the City identify opportunities for improvement, ETC Institute conducted an Importance-Satisfaction (I-S) Priorities Analysis. This analysis examined the importance that residents placed on each City service and the level of satisfaction with each service. By identifying services of high importance and low satisfaction, the analysis identified which services will have the most impact on overall satisfaction with City services over the next two years. If the City wants to improve its overall satisfaction rating, the City should prioritize improvements in services with the highest Importance Satisfaction (I-S) ratings. Details regarding the methodology for the analysis are provided in Section 3 of this report. Based on the results of the Importance-Satisfaction (I-S) Priorities Analysis, ETC Institute recommends the following:

- Overall Priorities for the City by Major Category. The first level of analysis reviewed the importance of and satisfaction with major categories of City services. This analysis was conducted to help set the overall priorities for the City. Based on the results of this analysis, the major services that are recommended as the top two opportunities for improvement over the next two years in order to raise the City's overall satisfaction rating are listed below in descending order of the Importance-Satisfaction rating:
 - Maintenance of City streets and facilities
 - Flow of traffic and congestion management in the City
- <u>Priorities within Departments/Specific Areas</u>. The second level of analysis reviewed the importance of and satisfaction of services within departments and specific service areas. This analysis was conducted to help departmental managers set priorities for their department. Based on the results of this analysis, the services that are recommended as the top priorities within each department over the next two years are listed below:
 - > Public Safety: enforcement of speed limits in neighborhoods
 - City Maintenance: maintenance of major City streets and adequacy of city street lighting
 - Parks and Recreation: number of walking and biking trails and community recreational centers

Section 2: Benchmarking Analysis

Benchmarking Summary Report Vestavia Hills, Alabama

Overview

ETC Institute's *DirectionFinder* program was originally developed in 1999 to help community leaders across the United States use statistically valid community survey data as a tool for making better decisions. Since November of 1999, the survey has been administered in more than 210 cities in 43 states. Most participating cities conduct the survey on an annual or biennial basis.

This report contains benchmarking data from two sources: (1) a national survey that was administered by ETC Institute during the summer of 2013 to a random sample of more than 4,000 residents across the United States and (2) individual communities with a population of less than 150,000 where ETC Institute had administered the *DirectionFinder Survey* between January 2010 and December 2013; the 53 communities included in these comparisons are listed below.

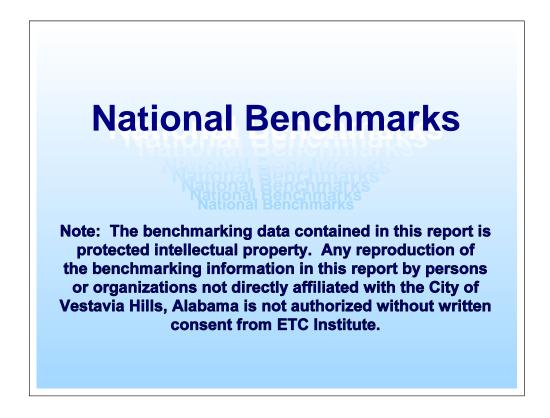

- Abilene, TX
- Auburn, AL
- Baytown, TX
- Bensenville, IL
- Blue Springs, MO
- Bryan, TX
- Chapel Hill, NC
- Clayton, MO
- Coffeyville, KS
- Columbia, MO
- Coral Springs, FL
- Davenport, IA
- Dothan, AL
- Edgerton, KS
- Garden City, KS
- Gardner, KS
- Grandview, MO
- Hallandale Beach, FL
- Harrisonville, MO
- High Point, NC
- Hyattsville, MD
- Independence, MO
- Indian Trail, NC
- Junction City, KS
- Lawrence, KS
- Lenexa, KS
- Merriam, KS

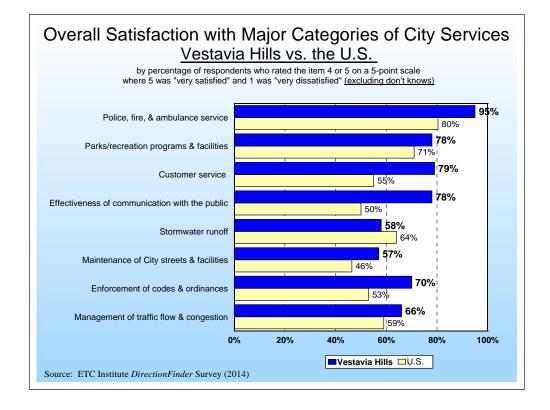

- Mission, KS
- Naperville, IL
- Narragansett, RI
- Newport Beach, CA
- North Kansas City, MO
- Olathe, KS
- Pflugerville, TX
- Platte City, MO
- Pueblo, CO

- Vestavia Hills, AL
- Village of Pinehurst, NC
- Wentzville, MO
- Westlake, TX
- Westlake, TX
- Wilmington, NC
- Winchester, VA

Interpreting the Charts

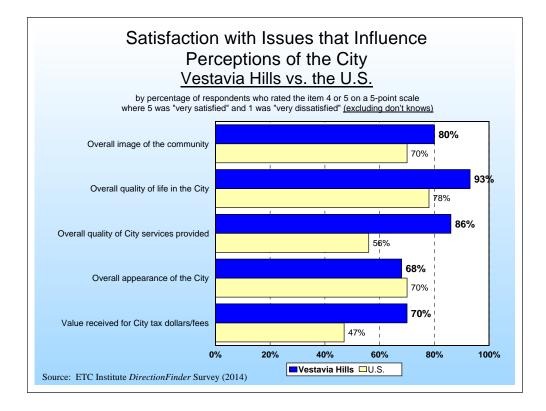

National Benchmarks. The first set of charts on the following pages show how the overall results for Vestavia Hills compare to the national average based on the results of an annual survey that was administered by ETC Institute to a random sample of more than 4,000 U.S. residents.

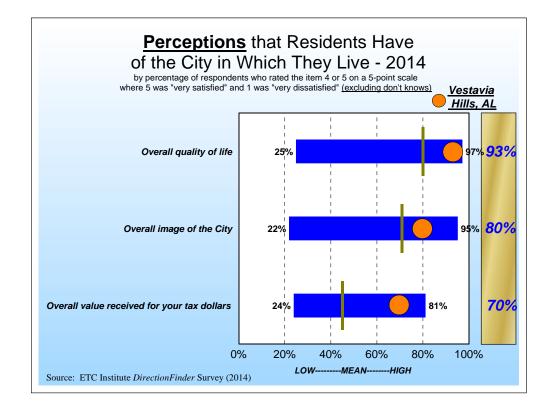

Performance Ranges. The second set of charts show the highest, lowest, and average (mean) levels of satisfaction in the 53 communities listed on the previous page. The mean rating is shown as a vertical line, which indicates the average level of satisfaction for the 53 communities. The actual ratings for Vestavia Hills are listed to the right of each chart. The dot on each bar shows how the results for Vestavia Hills compare to the other communities with a population of less than 150,000 where the DirectionFinder[®] survey has been administered since 2010.

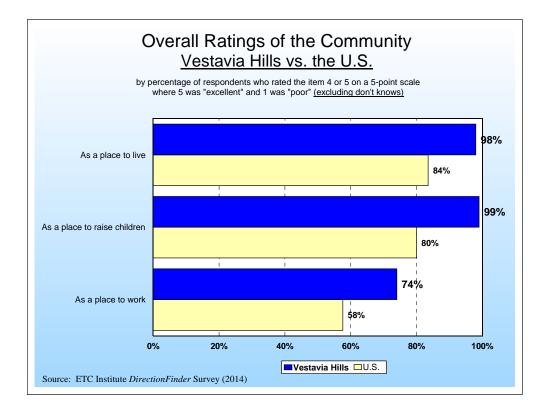

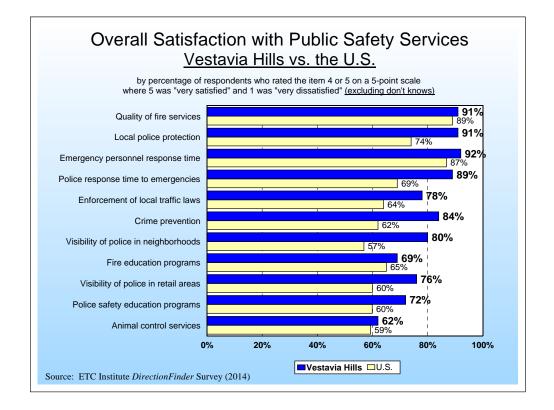

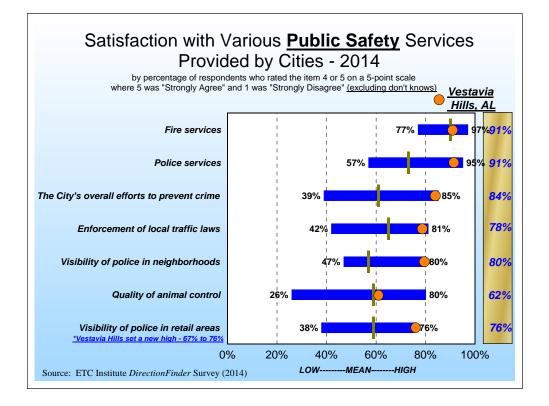

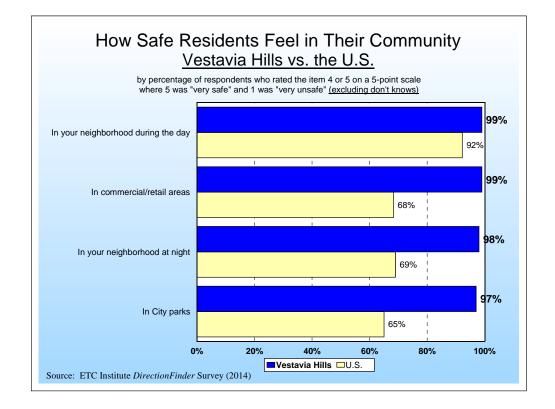

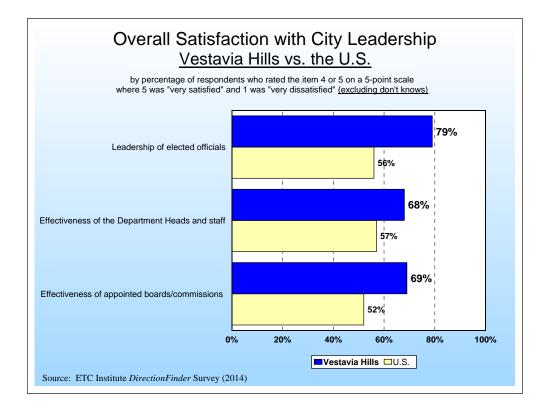

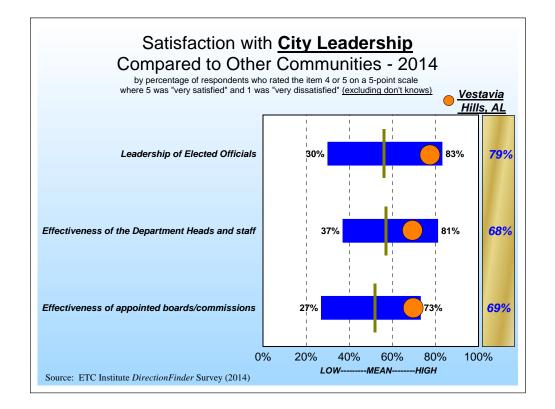

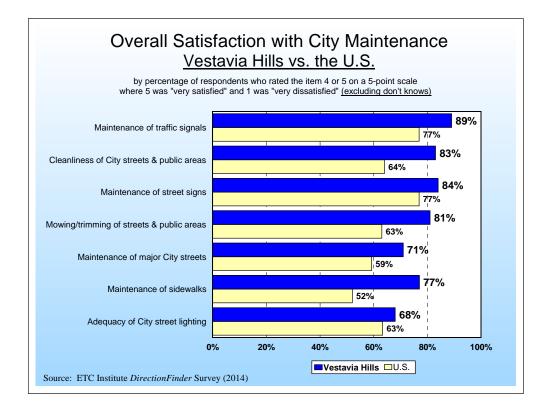

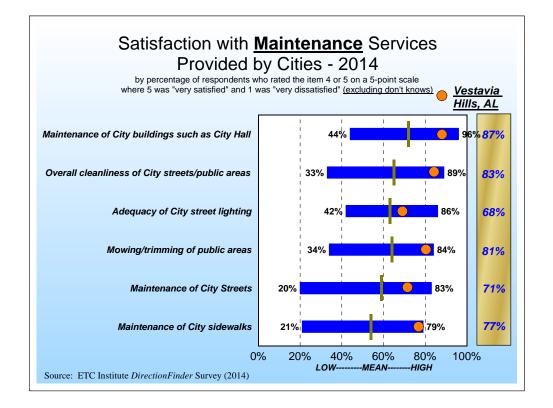

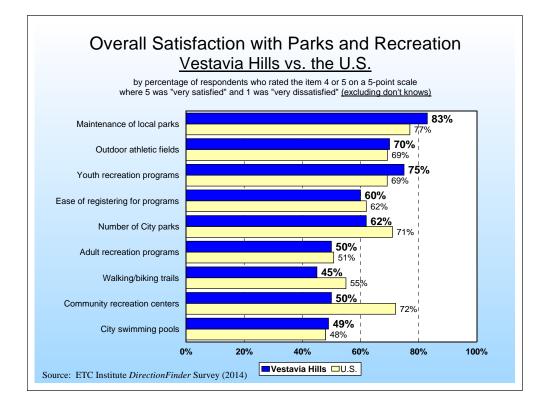

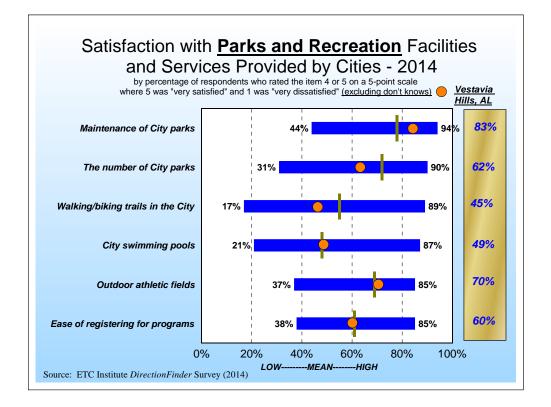

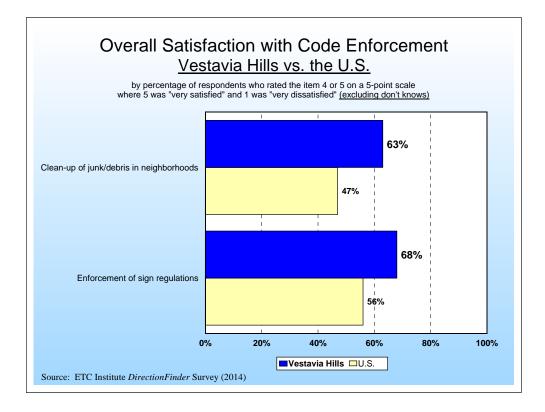

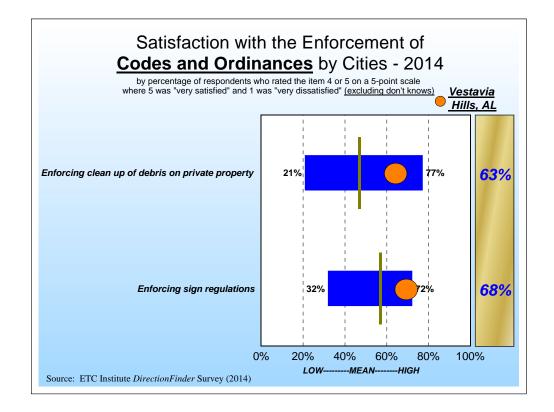

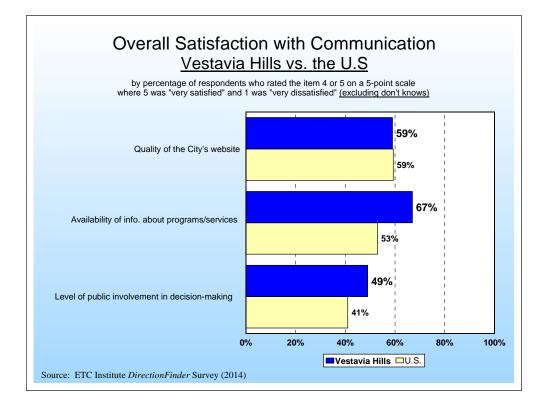

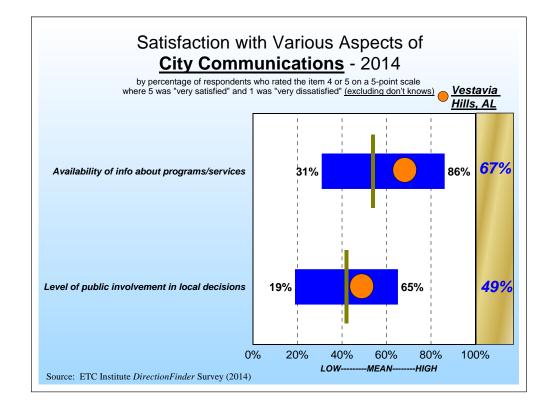

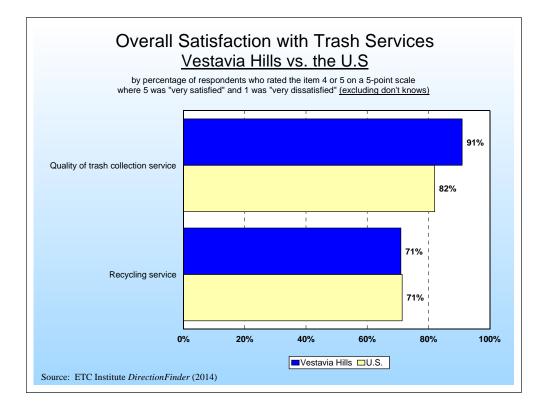

Section 3: Importance-Satisfaction Analysis

Importance-Satisfaction Analysis

The City of Vestavia Hills, AL

Overview

Today, city officials have limited resources which need to be targeted to activities that are of the most benefit to their citizens. Two of the most important criteria for decision making are (1) to target resources toward services of the <u>highest importance to citizens</u>; and (2) to target resources toward those services where <u>citizens are the least satisfied</u>.

The Importance-Satisfaction (IS) rating is a unique tool that allows public officials to better understand both of these highly important decision making criteria for each of the services they are providing. The Importance-Satisfaction rating is based on the concept that cities will maximize overall citizen satisfaction by emphasizing improvements in those service categories where the level of satisfaction is relatively low and the perceived importance of the service is relatively high.

Methodology

The rating is calculated by summing the percentage of responses for items selected as the first, second, and third most important services for the City to emphasize over the next two years. This sum is then multiplied by 1 minus the percentage of respondents that indicated they were positively satisfied with the City's performance in the related area (the sum of the ratings of 4 and 5 on a 5-point scale excluding "don't know" responses). "Don't know" responses are excluded from the calculation to ensure that the satisfaction ratings among service categories are comparable. [IS=Importance x (1-Satisfaction)].

Example of the Calculation. Respondents were asked to identify the major services they thought were the most important for the City to provide. Approximately fifty-three percent (53.2%) of residents selected "overall maintenance of City streets and facilities" as the most important major service to provide.

With regard to satisfaction, fifty-six percent (56%) of the residents surveyed rated their overall satisfaction with "overall maintenance of City streets and facilities" as a "4" or a "5" on a 5-point scale (where "5" means "very satisfied"). The I-S rating for "overall maintenance of City streets and facilities" was calculated by multiplying the sum of the most important percentages by 1 minus the sum of the satisfaction percentages. In this example, 53.2% was multiplied by 44% (1-0.56). This calculation yielded an I-S rating of 0.2341, which ranked first out of ten major City services.

The maximum rating is 1.00 and would be achieved when 100% of the respondents select an item as one of their top three choices to emphasize over the next two years and 0% indicate that they are positively satisfied with the delivery of the service.

The lowest rating is 0.00 and could be achieved under either one of the following two situations:

- if 100% of the respondents were positively satisfied with the delivery of the service
- if none (0%) of the respondents selected the service as one of the three most important areas for the City to emphasize over the next two years.

Interpreting the Ratings

Ratings that are greater than or equal to 0.20 identify areas that should receive significantly more emphasis over the next two years. Ratings from .10 to .20 identify service areas that should receive increased emphasis. Ratings less than .10 should continue to receive the current level of emphasis.

- Definitely Increase Emphasis (IS>=0.20)
- Increase Current Emphasis (0.10<=IS<0.20)
- Maintain Current Emphasis (IS<0.10)

The results for Vestavia Hills are provided on the following pages.

Importance-Satisfaction Rating City of Vestavia Hills, AL OVERALL

| Category of Service | Most Important % | Most Important Rank | Satisfaction % | Satisfaction Rank | Importance- Satisfaction Rating | I-S Rating Rank |
|--|---------------------|---------------------------|----------------|----------------------|---------------------------------------|--------------------|
| | | | | | | |
| <u>Very High Priority (IS >.20)</u> | | | | | | |

| Satisfaction %: | The "Satisfaction" percentage represents the sum of the ratings "4" and "5" excluding 'don't knows.' Respondents ranked their level of satisfaction with the each of the items on a scale of 1 to 5 with "5" being very satisfied and "1" being very dissatisfied. |

Importance-Satisfaction Matrix Analysis

The Importance-Satisfaction rating is based on the concept that public agencies will maximize overall customer satisfaction by emphasizing improvements in those areas where the level of satisfaction is relatively low and the perceived importance of the service is relatively high. ETC Institute developed an Importance-Satisfaction Matrix to display the perceived importance of major services that were assessed on the survey against the perceived quality of service delivery. The two axes on the matrix represent Satisfaction (vertical) and relative Importance (horizontal).

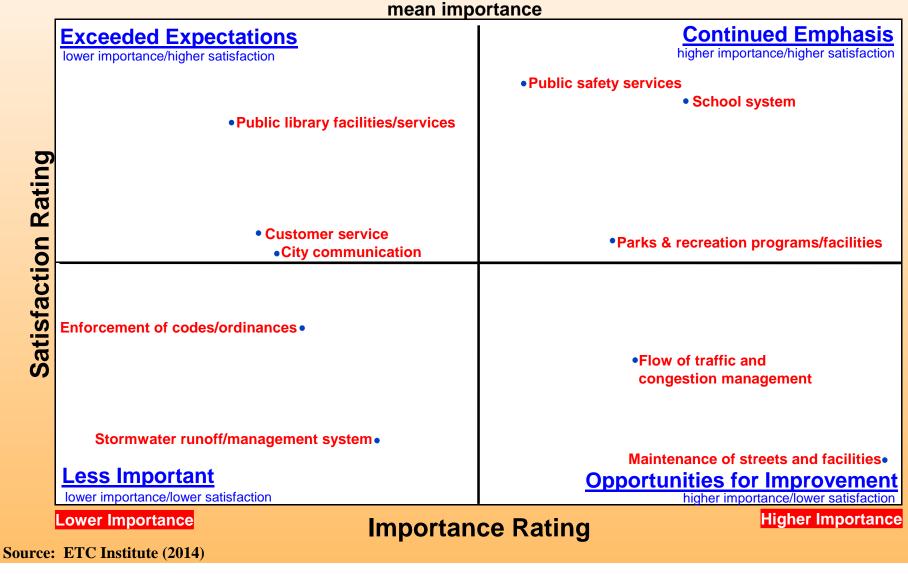

The I-S (Importance-Satisfaction) matrix should be interpreted as follows.

- Continued Emphasis (above average importance and above average satisfaction). This area shows where the City is meeting customer expectations. Items in this area have a significant impact on the customer's overall level of satisfaction. The City should maintain (or slightly increase) emphasis on items in this area.
- Exceeding Expectations (below average importance and above average satisfaction). This area shows where the City is performing significantly better than customers expect the City to perform. Items in this area do not significantly affect the overall level of satisfaction that residents have with City services. The City should maintain (or slightly decrease) emphasis on items in this area.
- Opportunities for Improvement (above average importance and below average satisfaction). This area shows where the City is not performing as well as residents expect the City to perform. This area has a significant impact on customer satisfaction, and the City should DEFINITELY increase emphasis on items in this area.
- Less Important (below average importance and below average satisfaction). This area shows where the City is not performing well relative to the City's performance in other areas; however, this area is generally considered to be less important to residents. This area does not significantly affect overall satisfaction with City services because the items are less important to residents. The agency should maintain current levels of emphasis on items in this area.

Matrices showing the results for Vestavia Hills are provided on the following pages.

Q16b-f. Several factors that may influence your perception of the quality of customer service you receive from City employees are listed below. Using a scale of 1 to 5 where 5 means "always" and 1 means "never", please rate your satisfaction with the customer service you received from the City Department you listed in Q16a.

(N=144)

Section 5: Survey Instrument

CITY OF VESTAVIA HILLS

OFFICE OF THE MAYOR

ALBERTO "BUTCH" ZARAGOZA MAYOR

Dear Vestavia Hills Residents,

We would appreciate your helping the City of Vestavia Hills plan for the future by completing the enclosed 2014 Vestavia Hills Survey.

One of the City's goals for this year is to conduct this Survey as a means of helping us understand our residents' perception of the services we provide. We plan to conduct a similar survey every two years, which will serve as a tool to establish budget priorities and policy making.

Please take a few minutes to complete and return this Survey in the postage-paid return envelope addressed to ETC Institute, our partner in this effort. Your responses are anonymous.

The comprehensive report analyzing the results will be available at the Municipal Center and posted on the City's website at www.vestaviahills.net this summer.

If you have any questions, you may contact the Mayor's Office at 978-3675.

Thank you for your participation.

Sincerely,

Alberto C. Zaragoza, Jr.

Mayor

Interpreting the Maps

The maps on the following pages show the mean ratings for several questions on the survey by Census Block Group. If all areas on a map are the same color, then residents generally feel the same about that issue regardless of the location of their home.

When reading the maps, please use the following color scheme as a guide:

- DARK/LIGHT BLUE shades indicate <u>POSITIVE</u> ratings. Shades of blue generally indicate satisfaction with a service, ratings of "excellent" or "good" and ratings of "very safe" or "safe."
- OFF-WHITE shades indicate <u>NEUTRAL</u> ratings. Shades of neutral generally indicate that residents thought the quality of service delivery is adequate.
- ORANGE/RED shades indicate <u>NEGATIVE</u> ratings. Shades of orange/red generally indicate dissatisfaction with a service, ratings of "below average" or "poor" and ratings of "unsafe" or "very unsafe."
