ELECTRICAL PERMIT APPLICATION

Page 2 of 2

The purpose of this list is to make you aware of some of the new construction requirements contained in the International Residential Building Code (IRC) as amended and adopted by the City of Vestavia Hills. Please be aware that this list is not all-inclusive and does not diminish the importance of those changes not covered.

ELECTRICAL SYSTEMS

- 1** E3902 Ground-Fault Circuit-Interrupter (GFCI) Protection for Personnel: All 15- and 20-ampere receptacles installed in garages, unfinished basements, crawl spaces, bathrooms, heated floors, kitchens where receptacles are installed to serve countertop surfaces, within 6 feet of the edge of laundry, utility and wet bar sinks, and outdoors must have GFCI protection.
- 2** E3902.16 Arc-fault circuit-interrupter protection: All 120-volt, single phase, 15- and 20-ampere branch circuits supplying outlets installed in dwelling unit family rooms, dining rooms, living rooms, parlors, libraries, dens, bedrooms, sunrooms, recreation rooms, closets, hallways, laundry rooms or similar rooms or areas shall be protected by a listed arc-fault circuit interrupter, combination type, installed to provide protection of the branch circuit.
- 3** E3609.3 An intersystem bonding termination for connecting intersystem bonding and grounding conductors required for other systems (e.g. lighting protection systems, communications, radio and TV, and CATV) shall be provided external to enclosures at the service equipment and at the disconnecting means for any additional buildings or structures. The intersystem bonding shall be accessible for connection and inspection. The intersystem bonding termination shall have the capacity for connection of not less than three intersystem bonding conductors.
- 4** E4002.14 Tamper-Resistant Receptacles in Dwelling Units: All 125-volt, 15- and 20-ampere dwelling unit receptacle outlets (as specified in E3901.1) shall be listed tamper-resistant receptacles
